

BMW F10 M5 LED Reverse Light Installation

This is a quick tutorial demonstrated on a BMW F10 M5 to swap out your stock reverse lights for some new LED backup lights.

Written By: Eric Wu

INTRODUCTION

Installing new LED backup lights are actually very easy. While this guide demonstrates it on a BMW F10 M5, you can use this as a guide to install any other LED reverse light since the concept is the same.

PARTS:

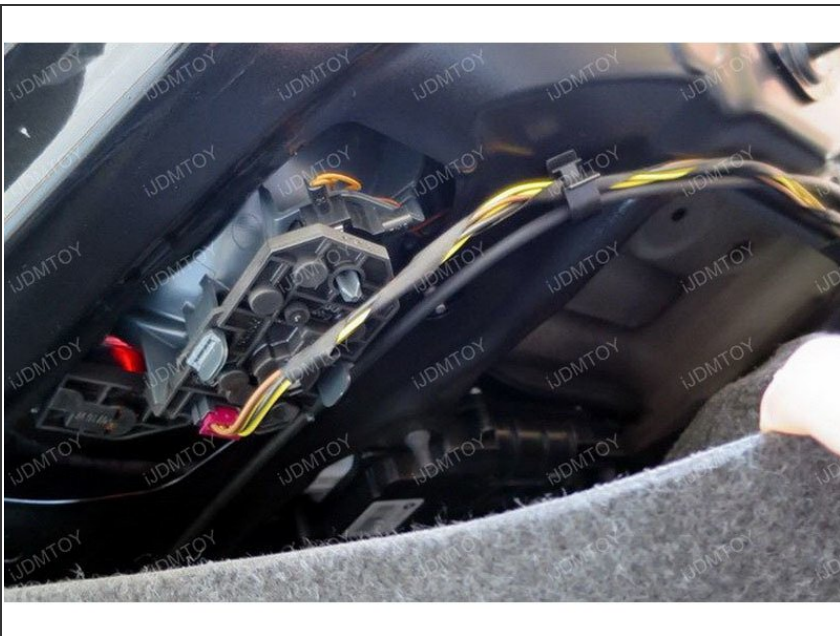

- [T10 LED Reverse Light Bulbs](#) (1)
 - [Projector LED Reverse Light Bulbs](#) (1)
-

Step 1 — BMW F10 M5 Reverse Lights

- Gain access to the back of the trunk
- Remove some clips that hold the trunk liner in place.
- **Tip:** You don't have to remove all the clips, just enough so you have enough access.

Step 2

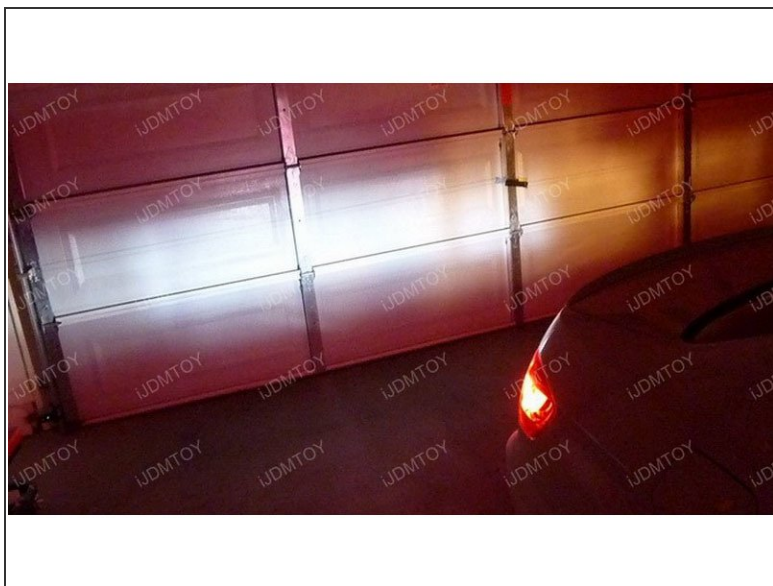

- Pull out the bulb tray.
- Press the two clips on the side to release.

Step 3

- Remove the bulb and swap it out with the new LED bulb.

Step 4

- Test to see if the LED reverse lights work and enjoy.

Installation will take absolutely no time at all and you will be on your way to some new LED reverse lights.
