Back Cover Replacement

This guide will describe the process of removing the back cover from your device.

Written By: Walker Karstens

INTRODUCTION

In order to access the components of your device, you will need to remove the back cover. This guide will help you accomplish this in a few simple steps.

🔧 TOOLS:

- iFixit Opening Tools (1)

This document was generated on 2019-10-30 03:10:54 PM (MST).

Step 1 — Back Cover

- Insert the plastic opening tool into the middle of the bottom edge of the device. The tool should be inserted within the seam between the back and front covers.

- Slide the opening tool to the right and slowly continue to separate the back cover from the device.

⚠️ Avoid prying on the buttons, as they are easily damaged.

Step 2

- Pull the cover off of the device once about three quarters of the cover has been pried open using the plastic opening tool.

To reassemble your device, place the back cover in place and apply gentle pressure to snap the cover back on the device.
