Step 1 — Case

- Use a wrench to loosen up the stand from the back in order to hold the NetCam more comfortably.

Step 2

- Work a plastic opening tool into the seam and pry the face plate away from the back panel.
Step 3

- Use pressure to separate the covers.

⚠️ When pulling the device apart, separate from the bottom up in order to avoid pulling the wiring at the top apart.

## Step 4 — Front Casing

- Carefully use your fingers to gently pull out the white attachment from the tan colored part.

Step 5 — Speaker

- Use a Phillips #0 screwdriver to take out the two 1.2 mm screws on the board.
Step 6

- With your fingers, pull the circuit board out of the back casing.

⚠ When pulling the board up be sure to do so carefully so you do not break the cord which is attached on the back side.

Step 7

- Gently pull the speaker out of the holder from the back of the cover.

Step 8

- The speaker wires are attached with the board. It can be unattached gently by pulling out the white attachment from the port.

Step 9 — Switch Cover

- On the back of the board pull the switch slowly upward to take it off.

To reassemble your device, follow these instructions in reverse order.
