Step 3

- Pry the panel up using a spudger and pull up firmly just enough to see the clips of wire on the sides.
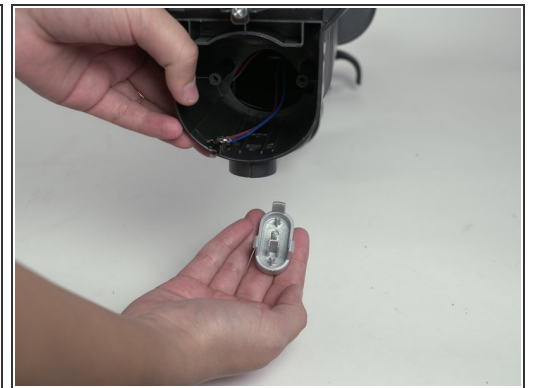

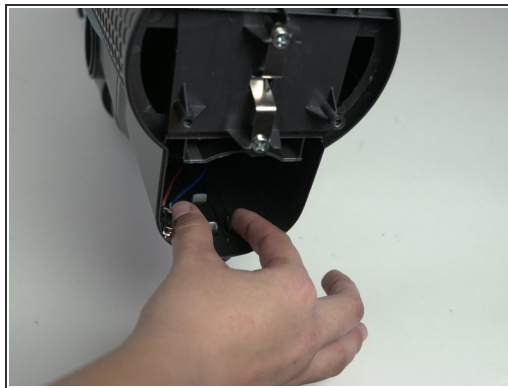

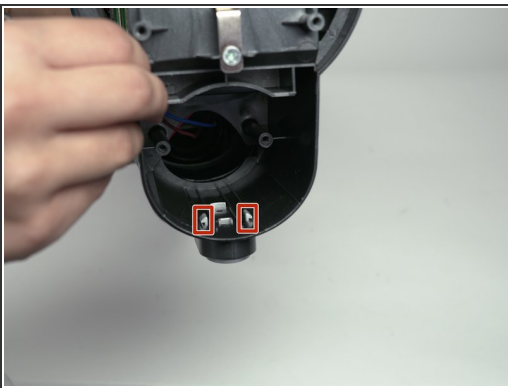

Step 4

- Remove the wire clips on both sides of the shaft.

Step 5

- Pull the top piece out of the shaft.

Step 6

- Pinch the two pairs of plastic catches (circled in the picture) to release the button.

To reassemble your device, follow these instructions in reverse order.
