## INTRODUCTION

Hi, I'm matt, I aspire for ultimate glory, bursting onto scenes with molds broken.

## Step 1 — Black and Decker AS150 Steam Advantage Iron Teardown

- I had to bore through the screws and then it went downhill from there, expect the worse from me after a tough night.

## Step 2

- as you can see is a deviation from the iron without water feature, and is to be used as a heat source from above, PIZZA? for me it's an opportunity to furthur my recycling

## Step 3

- Just going to store this doge away for now. That will be ten dollars please and thank you.
