

Black and Decker JE2200B Disassembly

The purpose of this guide is to assist the user to safely disassemble the juicer in an easy-to-learn and efficient manner.

Written By: Bhavika Shah

INTRODUCTION

Before using this device, make sure you learn how to disassemble the product from the following guide. Then, wash all the parts to extend life of the unit.

Step 1 — Unlocking Latches

- To undo the locking latches: Pull outwards at the bottom of each latch to detach them from the groove on the cover .

Step 2 — Removing the Cover

- To remove the cover: Take out the feeder, hold the chute firmly and pull up the cover.

Step 3 — Remove Pulp Separator

- To remove the pulp container: Hold the juice spout with one hand and the back edge of the pulp separator with the other hand. Pull it up while making sure that the cutter/strainer is kept in place

Step 4 — Remove Cutter/Strainer

- To remove the cutter/strainer: Hold the juice spout with one hand and clutch the edge of the cutter/strainer with the other hand; pull it out slowly.

⚠ 'The teeth on the cutter/strainer are very sharp.'

Step 5 — Remove Pulp Container

- To remove the pulp separator: Hold the sides firmly and pull the container out.

To reassemble your device, follow this guide in reverse order.
