

# Blackberry Curve 8320 Speaker Replacement

This repair guide shows the removal and replacement of the phone's main speaker.

Written By: Christopher Aiello

---

## INTRODUCTION

This guide will show you how to:

- Remove the battery
- Remove the front panel
- Replace the speaker

### TOOLS:

- [iFixit Opening Tools](#) (1)
  - [T5 Torx Screwdriver](#) (1)
-

## Step 1 — Battery

- ① Hold the phone with the back facing you.
- Press the silver tab down and remove the cover.

## Step 2

- Pull up on the top edge of the battery to remove it.

### Step 3 — Front Panel

- Use a plastic opening tool to gently pry the bottom cover loose.
- ⚠ Do not use excessive force at risk of damaging the antenna, which is under this casing.
- Pull the cover from the front of the phone after the back is loose.

### Step 4

- Remove the two top screws with a T5 Torx screwdriver.
- ⓘ The screws are 8mm long.

## Step 5

- Gently pry off the top of the side casings.

⚠ The side casings cannot be fully removed yet because they are screwed on at the bottom.

## Step 6

- Use a plastic opening tool to detach the securing clips holding the the front panel in place.

ⓘ There are six securing clips total.

## Step 7

- Remove the front panel.

**i** You may need to apply some force because the front panel is attached to the rest of the device with adhesive.

## Step 8 — Speaker

- Use a T6 Torx screwdriver to remove the four screws located on the corners of the keyboard frame.

**i** The screws are 6mm long.

## Step 9

- After the bottom two screws have been removed the side casings can be removed.

## Step 10

- Remove the back case.

**i** The speaker is located on the back case.

To reassemble your device, follow these instructions in reverse order.
