

Bose SoundTouch Portable Subwoofer Replacement

Replace subwoofer on your Bose SoundTouch Portable.

Written By: Chelsea Martin

 **TOOLS:**

- [T10 Torx Screwdriver \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Small Needle Nose Pliers \(1\)](#)

Step 1 — Speaker Battery

- Remove the two T-10 machine screws at the bottom of the device.

Step 2

- Turn the device around.
- From the top, lightly push down the back cover to release it.
- Lift the bottom of the cover and pull it up.

Step 3

- Remove the two T-10 machine screws, then pull the battery straight out.

Step 4 — Grille

- Remove the two screws holding the speaker grille in place.

Step 5

- Grip the sides of the device and push the speaker grille down and out.

Step 6

- Gently release the ribbon from its connector and remove the grille.

Step 7 — Metal Trim

- Remove the two screws using a torx screwdriver.

Step 8

- With the bottom of the device facing you, pull down the trim pieces to remove from the device body.

Step 9 — Subwoofer

- Separate the case that holds the subwoofer in place.

 Be careful when doing this step because there are several connectors inside.

Step 10

- Gently pull on the connectors at the circuit board to remove. Remove the screws from the circuit board and set the board aside.

Step 11

- Remove the four screws from the subwoofer and lift it out of the casing.

To reassemble your device, follow these instructions in reverse order.
