INTRODUCTION

Many functions, including the LCD screen dial pad and device functions can wear and no longer work and may need to be replaced.

🔧 TOOLS:
- Phillips #2 Screwdriver (1)

Step 1 — Remove screws holding the front panel

- Unscrew these three 12.1mm screws holding the control panel in place.

Step 2 — Unplug the panel from the rest of the printer

- Lift up the front panel from the device.

- Gently lift up and pull out the data cables that attach the panel to the printer.

To reassemble the front panel, follow these instructions in reverse order.
