INTRODUCTION

Damaged presserfoot? It is easy to replace and this guide will take you through the necessary steps.

Step 1 — Presserfoot

- Make sure the presser foot is in the up position.
- *(i)* The switch should be up, not in the vertical position.

Step 2

- Adjust the needle to the top of its stroke using the hand wheel.

Step 3

- Lift the arm on the back of the presser foot assembly to release the foot.

Step 4

- Remove the presser foot.

To reassemble your device, follow these instructions in reverse order.
