INTRODUCTION

This fix is safe and only requires a screwdriver.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)

Step 1 — Front Panel

- Remove the two 4.8 mm black screws above the lens on the front of the camera.

Step 2

- Remove the 4.3 mm black screw under the lens ring, and the 4.8 mm black screw under the camera.

Step 3

● Remove the 4.8 mm black screw on the left side of the camera.
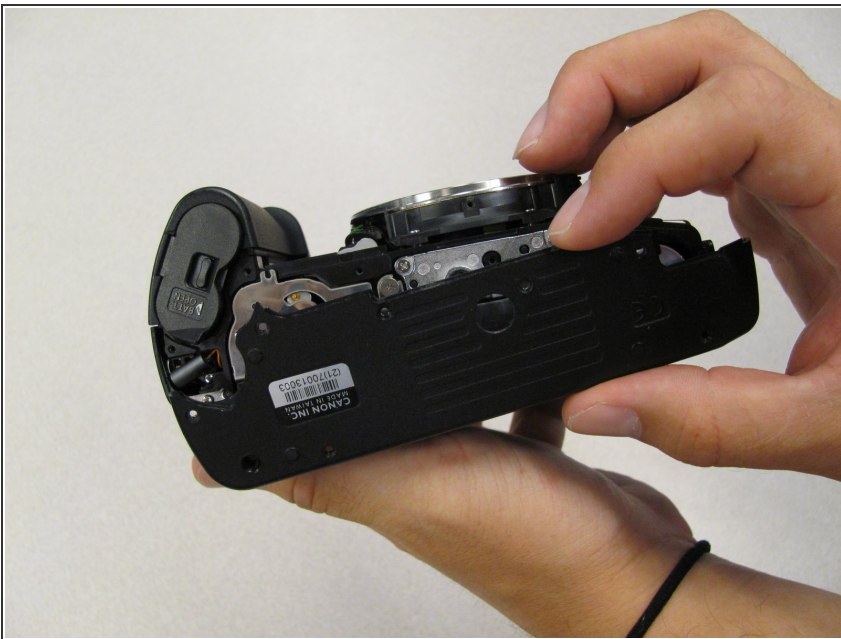

Step 4

● Remove the front panel by lifting it away from the camera's body.

Step 5 — Bottom Panel

- Remove seven 4.25 mm black screws on the bottom panel.

Step 6

- Remove the bottom panel.

This document was generated on 2019-09-23 06:40:32 PM (MST).

## Step 7 — Side Panel With Remote Control Socket

- Remove two 6.5 mm black screws from the panel.

Step 8

- Remove the plastic remote control socket cap by pulling it straight out.

Step 9

- Slide panel toward bottom of camera to remove.

Step 10 — Top Panel

- Slide the outer eyepiece upward to remove it.

Step 11

- Remove the two 4.75 mm black screws located on the top of the camera.

Step 12

- Remove the four 4.3 mm black screws near the bottom corners of the eyepiece at the back of the camera.
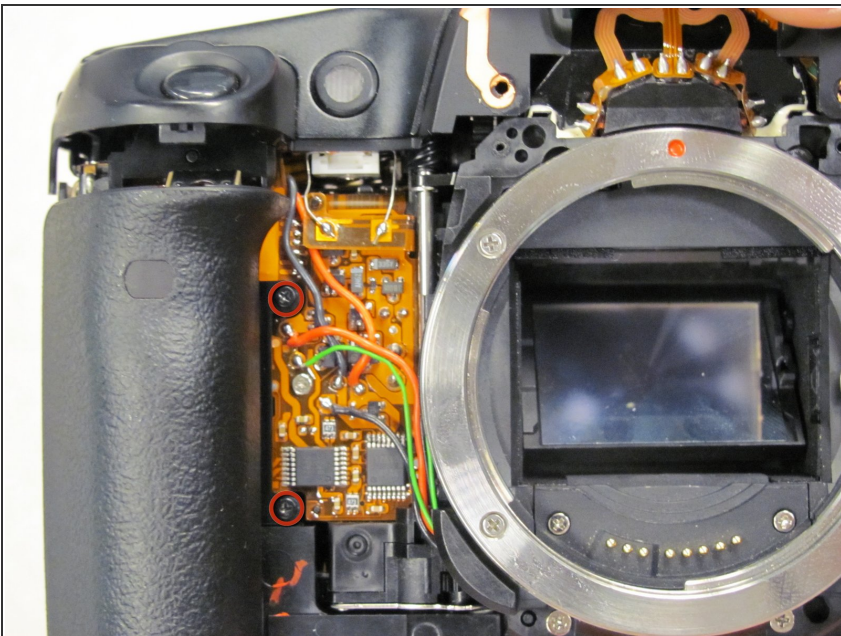

Step 13

- Slowly separate the top panel from the camera by pushing it upward.

⚠️ Separating the top panel too far or quickly can damage the ribbon cable and connecting wires that are still attached to the top panel of the camera.
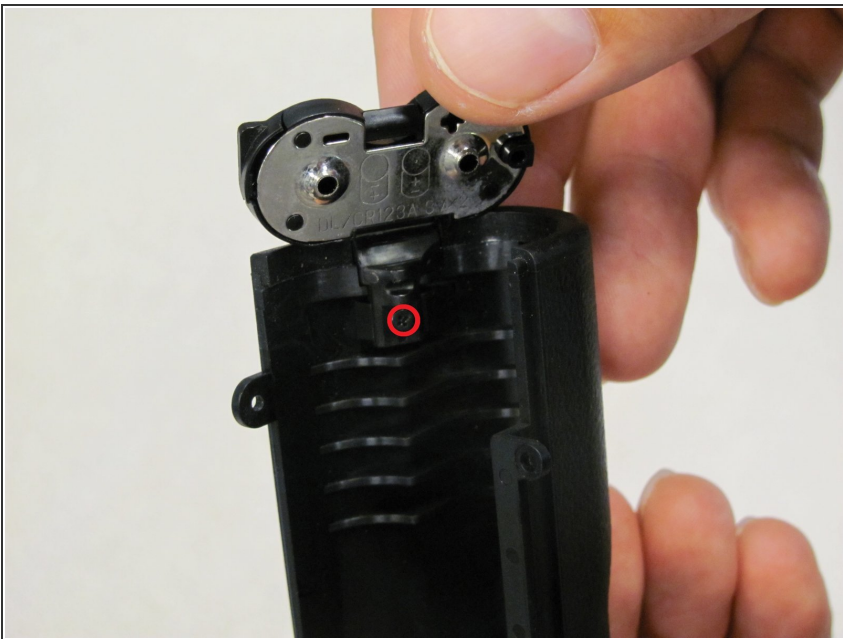

Step 14 — Grip

- Remove the two 5.5 mm screws from front of camera.

Step 15

- Remove grip panel.

Step 16 — Battery Door

- Remove one black screw from battery door on underside of grip.
