

Canon EOS 300 Top Panel Replacement

The top panel of the camera will be removed.

Written By: Tammy Kong

INTRODUCTION

Taking off the top of the camera allows repair access to the eye piece and command dial.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)
 - [Spudger](#) (1)
-

Step 1 — Batteries

- Open up the battery door.

Step 2

- Remove the batteries from the camera by sliding them out into your palm.

Step 3 — Side Panel with Lever

- Release the side latch to open the back panel.

Step 4

- Remove the two black 4.5mm screws above and below the latch.

Step 5

- Using your finger, carefully pry open the side panel from the top of camera.
 - Pull panel downwards to remove.
- i** Make sure to keep track of the small black piece of rubber under the latch.

Step 6 — Front Panel

- Remove the two silver 6mm Phillips #1 screws.

Step 7

- Flip camera over to the bottom.
- Remove the one 5mm Phillips #1 silver screw.

Step 8

- Remove the front panel by pulling away from the side with the lever.

Step 9 — Bottom Panel

- Remove three black 7.3mm Phillips #1 screws located on the corners of the camera.
- Remove five black 4.8mm Phillips #1 screws.

Step 10

- Simply remove the bottom panel by prying it off with your finger.
- ⚠ When removing the panel, be sure the bottom of the camera is facing upright. There are loose gears that may fall out.
- Be wary of a loose piece of foam attached to the bottom panel.

Step 11 — Side Panel with Grip

- Remove the remote control socket cover.

Step 12

- Remove two black 4.5mm Phillips #1 screws.

Step 13

- Remove two black 4.8mm Phillips #1 screws on the front of the camera.

Step 14

- Pry open the side grip using a spudger.

Step 15 — Eyecup

- With your hands, remove the rubber grip from the eye piece.

Step 16

- Remove the eyecup from the eyepiece by pushing the eyecup up.

Step 17 — Top Panel

- Remove two silver 5.0mm Phillips #1 screws.

Step 18

- Remove the silver 5.5mm Phillips #1 screw.

Step 19

- Pry the top silver part of the camera off.

⚠ Buttons may slip out of the camera's top as the top is pulled off the camera (shown in picture two).

To reassemble your device, follow these instructions in reverse order.
