Canon EOS Rebel G Grip Replacement

Written By: Kyle Reis

INTRODUCTION

This guide shows you how to install the grip on your camera.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- Spudger (1)

Step 1 — Front Panel

● Using a #00 Phillips screw driver, remove three 4.4 mm Phillips screws as indicated by the red circles.
Step 2

● Using your finger, peel back the textured grip so the components are separated.
Step 3

- Using the flat end of a spudger, loosen the connection between the front panel and the device.

- Remove the front panel using your hands.
Step 4 — Grip

- Using a 00 Phillips screw driver, unscrew the two 4.9 mm Phillips screws. on the inside of the camera.

Step 5

- Using a 00 Phillips screw driver, unscrew the two 4.3 mm Phillips screws on the side of the camera.

- Use your fingers to pull out the plug that is located between the screw holes.

Step 6

- Use the flat end of a spudger to pop the grip off and remove grip.

To reassemble your device, follow these instructions in reverse order.
