Canon EOS Rebel T4i Flash Replacement

In this guide, users will be able to take apart the flash piece of the camera.

Written By: Jordan Rabold

INTRODUCTION

This guide details how to replace the flash bulb of this camera.

🔧 TOOLS:

- Tweezers (1)
- Flush Wire Cutters (1)
- Phillips #000 Screwdriver (1)

This document was generated on 2019-09-18 03:34:29 PM (MST).

Step 1 — Battery

- Locate the battery cover at the bottom of the camera.

- Pull down on the black tab to open the cover.

Step 2

- Push the grey tab on the right side of the battery.

- Remove the battery from the slot.

Step 3 — Flash

- Using the Phillips screwdriver, unscrew the two 4.9mm Phillips head screws which are located underneath the flash.

Step 4

- Remove the covering.

Step 5

- Use the tweezers to remove the excess glue around the wiring. This will allow you to cut the wire and remove the light in the next step.

Step 6

- Use the wire cutters to cut the wiring connected to the flash.

To reassemble your device, follow these instructions in reverse order.
