INTRODUCTION

Use this guide to remove the lens mount ring. This particular Canon SLR has a plastic lens mount ring that can wear faster than the metal lens mount rings on other models.
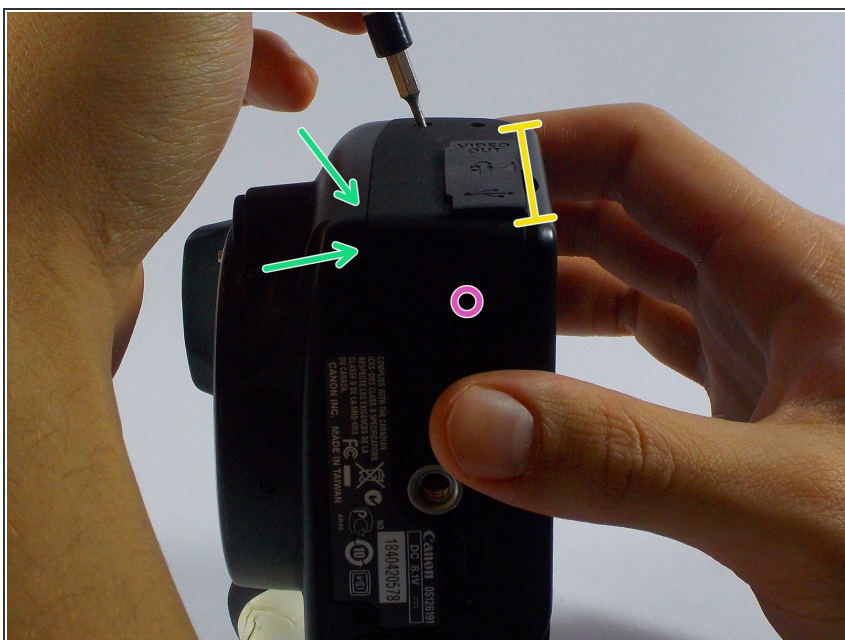

TOOLS:

- Phillips #00 Screwdriver (1)
- Tweezers (1)

Step 1 — Latch Side Cover

- Remove the two 3mm (1/8") black screws from the side cover using a #00 Phillips screwdriver.

Step 2

- On the bottom, remove the 6mm (13/64") screw with the #00 Phillips Screwdriver.

- Pry up the panel; starting from the front/bottom corner, as indicated.
  - There's a concealed lip, under the opposite edge.

Step 3 — Disassembling Canon EOS Rebel XS Front Cover

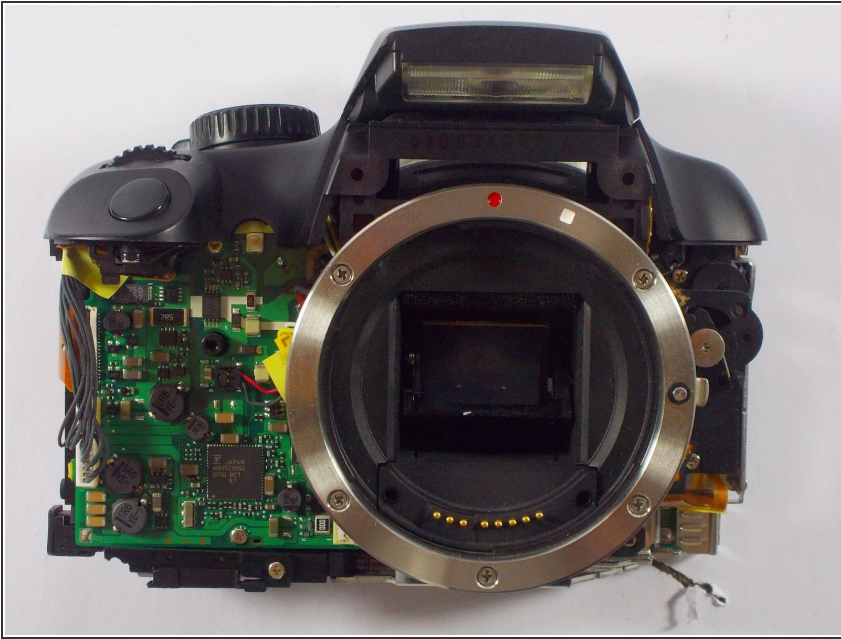

- Remove three medium length screws from the bottom of the camera
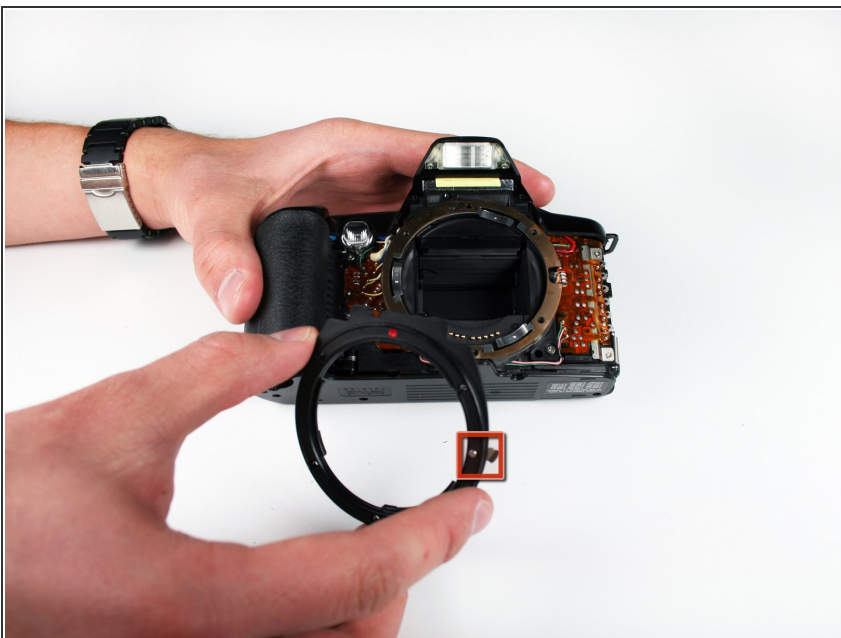

Step 4

- Remove the two medium length screws on the front panel of the camera above the lens mount.

- Once you done, you may use the Spudger to panel from non-grip side.

- ⓘ If you start on the grip side, it will be more challenging to loosen the panel.

Step 5 — Canon EOS Rebel XS Lens Mount Ring Replacement

- Remove the five silver screws from the lens mounting ring using a Phillips screwdriver.

Step 6

- Use your fingers to remove the lens mounting ring.

- (i) There is a small metal button housed in the ring (red square). Be careful not to lose this piece when removing the ring.
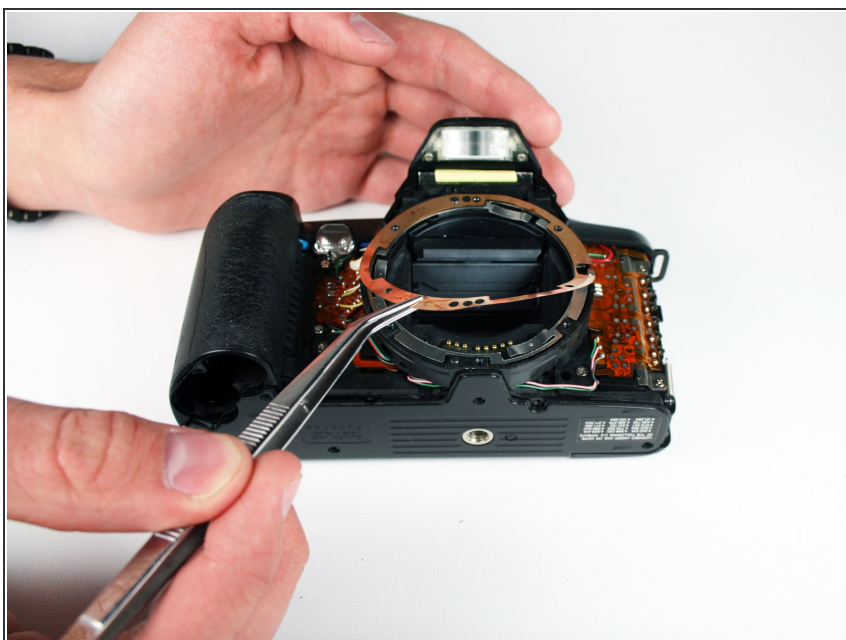

Step 7

- Use a pair of tweezers to remove the spring on the lens mounting ring.

Step 8

- Use a pair of tweezers to remove the gold metal ring.

- ⓘ Take note of the ring's orientation for re-installing it.

To reassemble your device, follow these instructions in reverse order.
