Canon PowerShot A4000 IS Battery Replacement

This guide demonstrates how to remove your Canon PowerShot A4000 camera battery.
Written By: Ansley Gardner
Step 1 — Opening the Battery Compartment

- The area highlighted in red is the door to the battery compartment. It is identified by the label CARD/BATT.OPEN and an arrow pointing outwards from the camera. This is showing the direction you are going to push to open the compartment.

Step 2

- Using your finger, apply pressure to the grooves at the top right corner of the camera that is highlighted in red. Slide the door to the battery compartment open.

Step 3 — Inside The Battery Compartment

- This is the open battery compartment. The battery has an arrow on it pointing in the direction the battery needs to be oriented in the camera.

- The green box is highlighting the switch used to remove the battery. Using your finger, press the red switch backwards, away from the lens, and the battery will be released.
