

# Canon PowerShot ELPH330 HS Camera

## Power/Shutter Button Panel Replacement

Use this guide to replace the power and shutter button panel in your Canon PowerShot ELPH330 HS Camera.

Written By: Michelle Ngo

## INTRODUCTION

If you're experiencing problems with your camera turning on or the camera taking photos, consider replacing the power/shutter button panel in your camera. This guide will show you how to replace your damaged power button.

### TOOLS:

- [Spudger](#) (1)
- [Phillips #00 Screwdriver](#) (1)
- [Phillips #000 Screwdriver](#) (1)

### PARTS:

- [Canon replacement power button assembly for PowerShot ELPH 330HS](#) (1)

## Step 1 — Power/Shutter Button Panel

- On the top-center of your device, turn off the camera by pressing the power button.
- Put your finger on the battery door and slide the battery door to the right to open it.
- Push the release button downward and it will release the battery.

## Step 2

- Use the Phillips #00 screwdriver to remove the screws.

## Step 3

- Remove the two 4.0mm screws on the bottom of the camera located near the battery door using a Phillips #00 screwdriver.

## Step 4

- At the bottom of the camera next to the battery door, remove two more screws using the Phillips #00 screwdriver.

## Step 5

- To remove the back portion of the camera case, use your fingers to carefully pry the case apart at the seam.

## Step 6

- On the motherboard there should be a white port. Using the spudger, disconnect it from the motherboard.

## Step 7

- Follow the green and white wire. There is a gray piece of rubber holding the button into place. Remove it with the spudger.

## Step 8

- Lift the panel off from the top of the camera with your hands.

To reassemble your device, follow these instructions in reverse order.
