Canon PowerShot SX150 IS Prerequisite

This repair guide works as a prerequisite for most other repairs.

Written By: Sam Blanton

INTRODUCTION

Prerequisite Only

🔧 TOOLS:

- Tweezers (1)
- JIS Driver Set (1)

This document was generated on 2019-10-05 05:01:59 PM (MST).

Step 1 — Canon PowerShot SX150 IS Prerequisite

- Remove the two 2mm screws above the screen using the size J000 screwdriver.
Step 2

- Remove the two 5mm screws from the side of the camera with the J000 head screw driver.

- Using the same screwdriver, remove the one 5mm screw from the other side of the camera located under the A/V Out flap.

Step 3

● Remove two 4mm screws from the bottom of the camera with the J000 head screw driver.

Step 4

● Remove the plastic panel surrounding the back screen.

Step 5

- Remove the three 3mm screws using the size J000 screw driver from the button plate.

- Gently flip up the flex ribbon lock and remove the flex ribbon using tweezers.

- Move the button plate out of the way.

Step 6

- ⓘ There is a black flex ribbon lock that must be lifted and unlocked with your tweezers before this flex ribbon will detach.

- ⚠ Any small tear could ruin the flex ribbon. Be very gentle while removing it.

- Gently lift the lock and detach the flex ribbon from the circuit board with the tweezers.

Step 7

- Remove the two 2mm screws from the bottom of the screen with the size J000 screw driver.

- You can then lift the screen out of place and set it aside.
Step 8

- With the J000 Philips head screwdriver, remove the two 2mm screws from under the flash.

- Using the same screwdriver, remove the two 5mm screws from the bottom. One is under the battery door.

- With the same screwdriver, remove the 2mm screw at the top of the metal plate.

Step 9

- Gently detach the flex ribbon with your tweezers before removing the front plate.

Step 10

- Using the J000 Philips head screwdriver, remove the four 7mm screws from the silver panel.

- Remove the two 5mm screws.

- Remove the one 3 mm screw.

- Using the same screwdriver, remove the 3mm screw from the top of the camera.

- Pull the panel off and set it aside.
