INTRODUCTION

Does your quadrocopter not power on after you already charged the battery? This guide will show you how to the replace the damaged or defective battery in 3 quick and easy steps.

www.iFixit.com

Step 1 — Battery

- Flip the quadrocopter over so that the underside of the device is facing up.

- Unplug the battery cable from the socket on the quadrocopter.
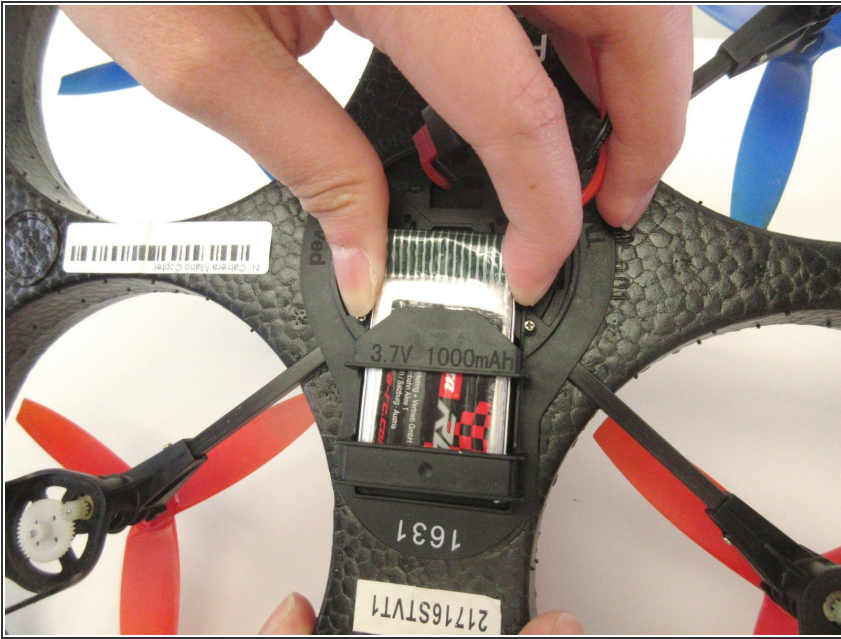

Step 2

- Push the battery upward with your thumbs to loosen it from the tight slot until your thumbs can not reach the bottom of the battery anymore.

Step 3

- Pull the battery away from the slot to remove it.

To reassemble your device, follow these instructions in reverse order.
