INTRODUCTION

How to replace the axles.

TOOLS:

- [Phillips #00 Screwdriver](#) (1)

PARTS:

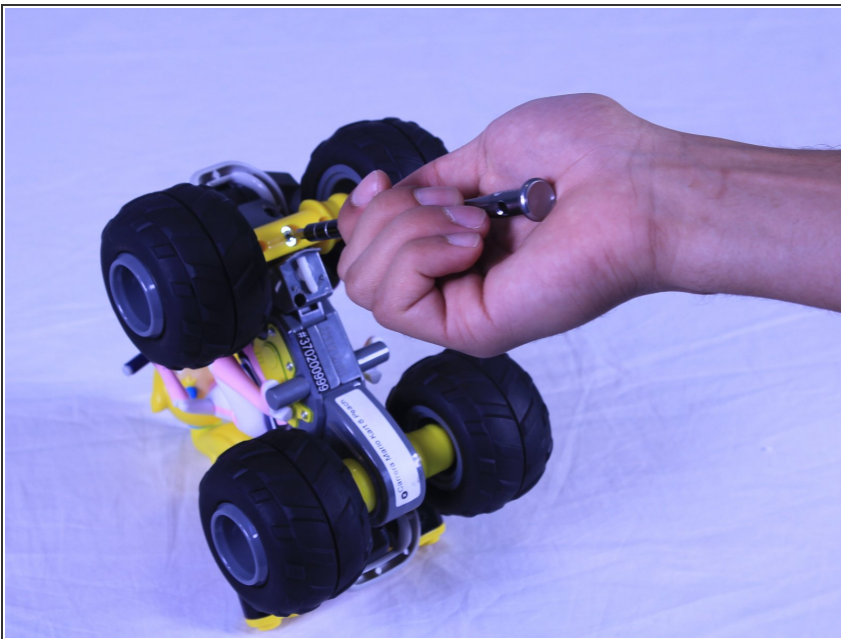

- [Carrera RC Mario Kart 8 Peach Front Axle](#) (1)

Step 1 — Axle Replacement Guide

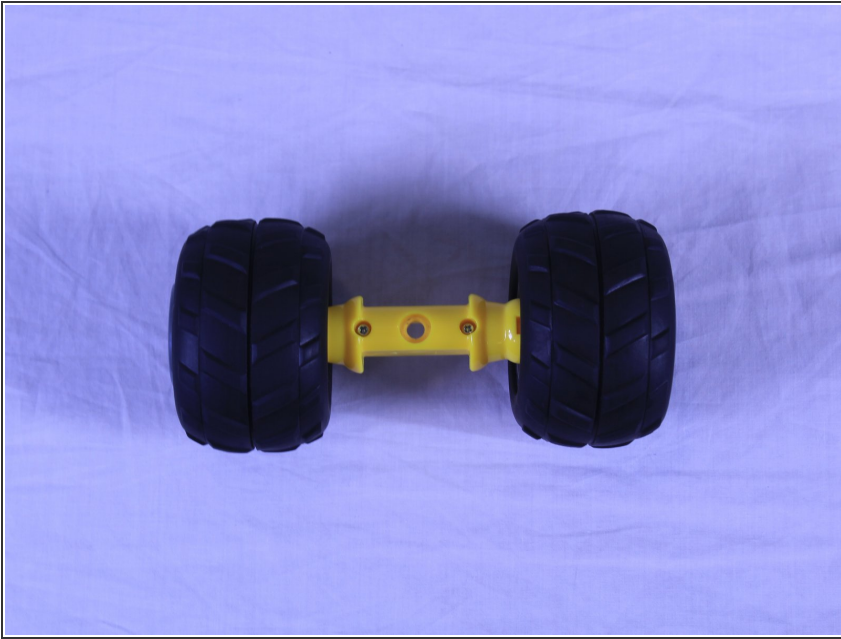

- Flip the car with the bottom side facing up.
- Using a Philips screwdriver, remove the middle screw on the front axle while holding it the axle in place.
- Carefully place the screw in a magnetic pad (or somewhere you won't lose)

Step 2

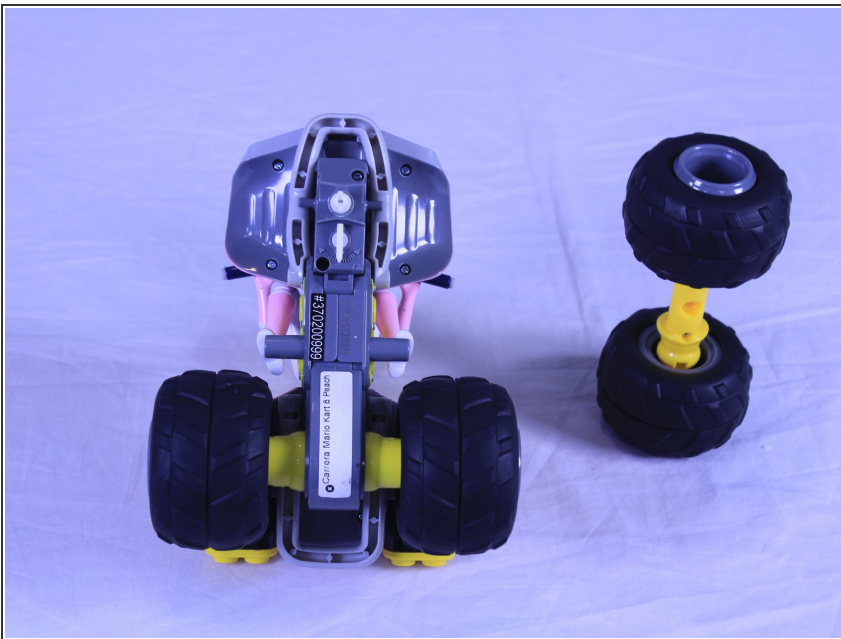

- Place the new axle where on the curved side is pointed towards center.
- ⓘ Screw it into place but make sure it isn't too tight. The axle needs to be able to move a bit.

Step 3

- Repeat the same steps for the back axle of the car but without concern of the curved part.

Step 4

- Place the new wheel into the car and attach the new screw

To reassemble your device, follow these instructions in reverse order.
