Step 1 — Remove front and back screws

- Use a screwdriver to remove the front and back 5 mm screws.

- ⓘ There are 4 screws in the back and 2 screws in the front.

Step 2 — Remove side-Back cover

- Use your hands to remove the side cover from any corner of the phone.

- Push the screen with your thumbs so that the frame comes out easily.

- ⚠ Make sure to push gently because the frame is fragile.

Step 3 — Remove Side-Front cover

- The side-front cover will come out easily because it is not attached any more by the side-back cover.

Step 4

- Unscrew the eight 2.5mm Phillips screws in the holes of the casing.

Step 5

- After all the side screws are removed, pull off the motherboard cover.

Step 6

- Unscrew all 2.5 mm attached to the mother board.

⚠️ Do not touch the integrated circuits in the mother board.

Step 7 — Motherboard

- Finally, use the spudger very gently to remove the motherboard.

Step 8 — Removing external volume pads

- Following step 4 in the prerequisite guide, remove the volume pads located on the side of the phone with a gentle pull.

Step 9 — Removing internal volume buttons

● Following step 6, remove the adapter connecting the volume buttons to the motherboard.

To reassemble your device, follow these instructions in reverse order.
