

# Cineyo BT-03 Device Battery Replacement

This guide will allow you to replace the battery.

Written By: Cole Crawford

## INTRODUCTION

This guide will take you step by step through the simple process of replacing your broken battery so you may use your device again!

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)

### PARTS:

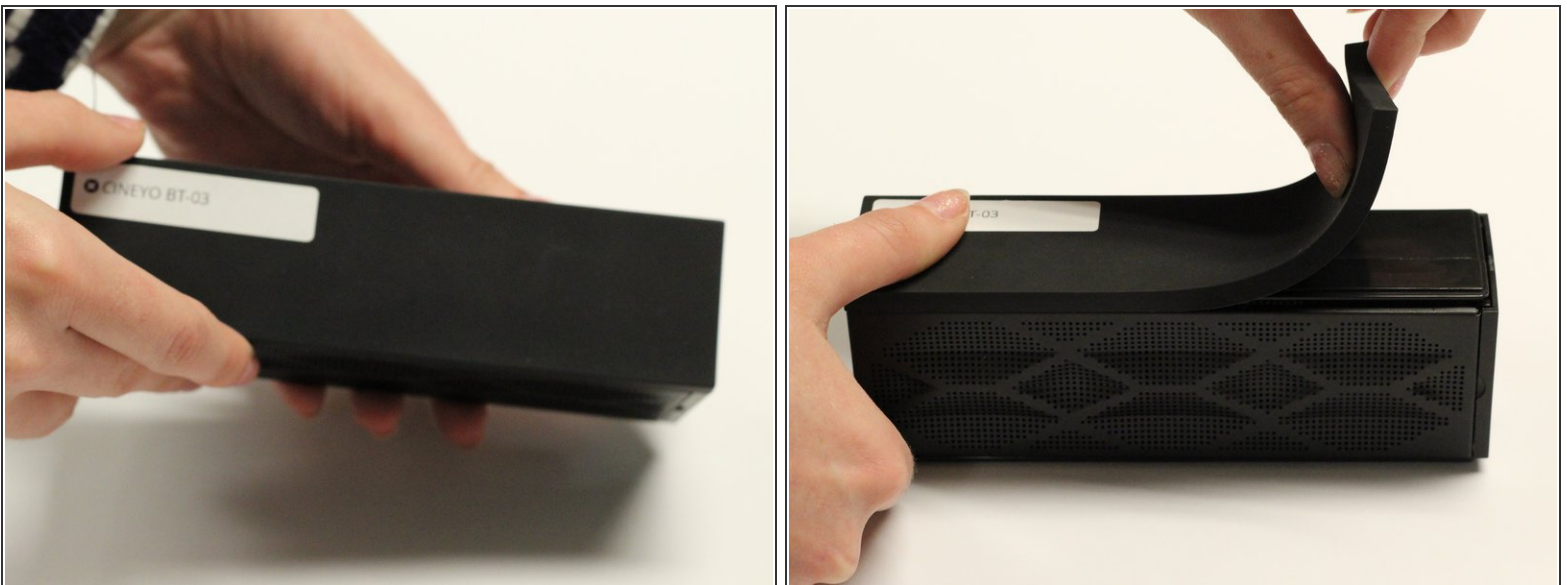

- [New 5V 1000mAh Lithium-Ion Battery](#) (1)
- [Sticky Pads](#) (1)

## Step 1 — Cineyo BT-03 Device Disassembly

- Remove the top (button side) rubber cover using your hands.

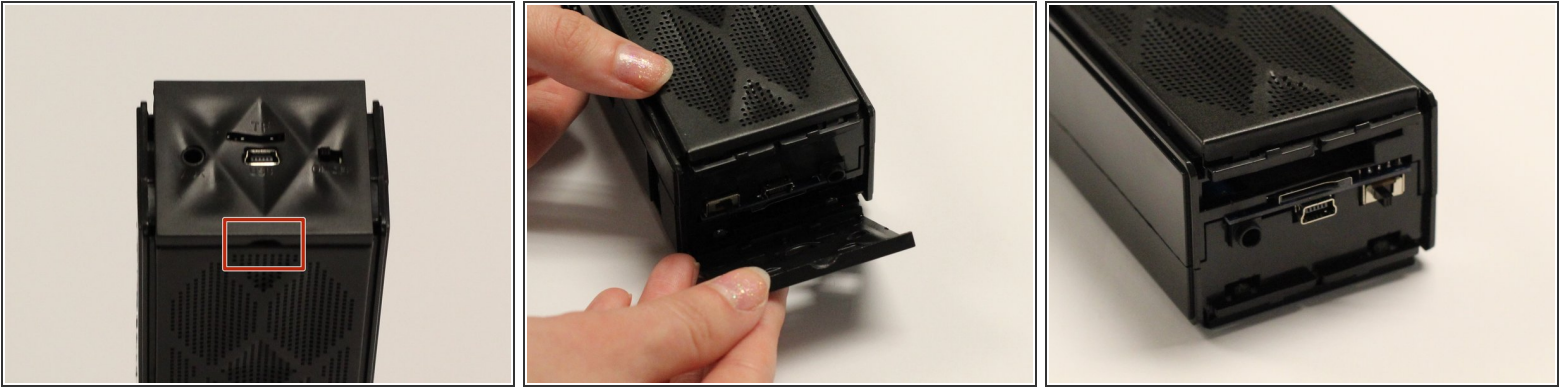

## Step 2

- Flip over the device and remove the bottom rubber cover using your hands.

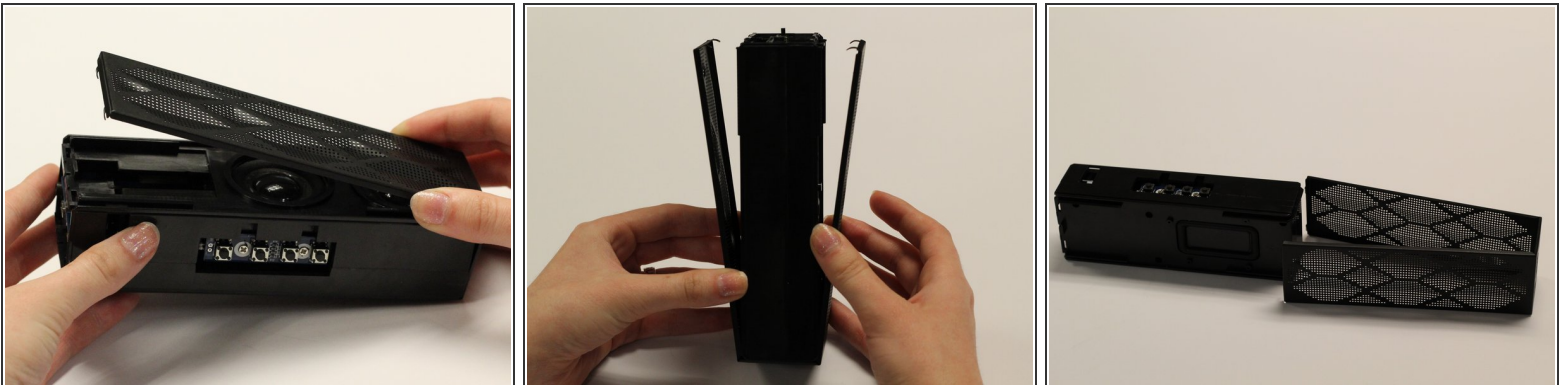

## Step 3

- Using your hands, pull off the plastic side cover (on the side with the audio jack) using the indented tab. The indented tab has been highlighted in the picture.

## Step 4

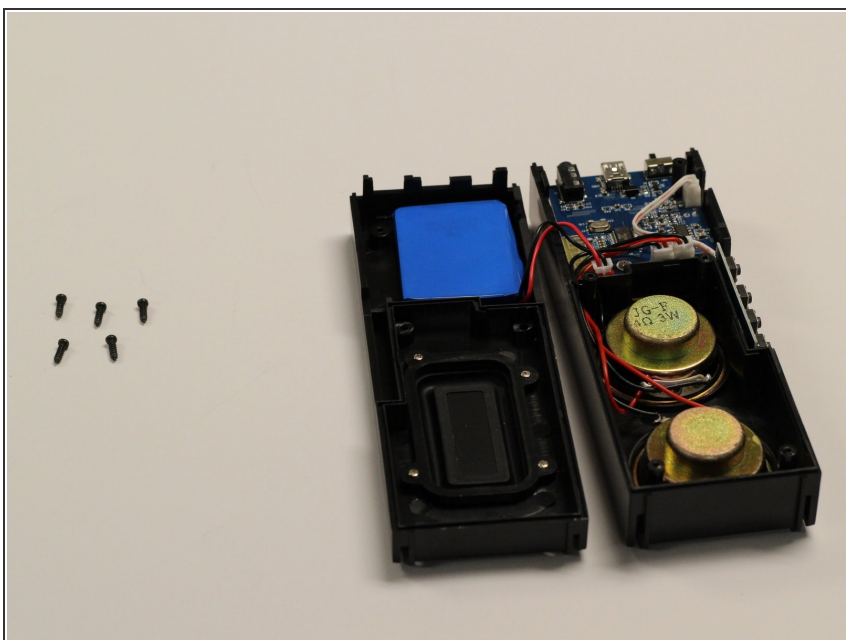

- Detach the plastic speaker cover on both the front and back sides. Then slide the cover off of the device.
- ⓘ The cover should remain as one solid piece.

## Step 5

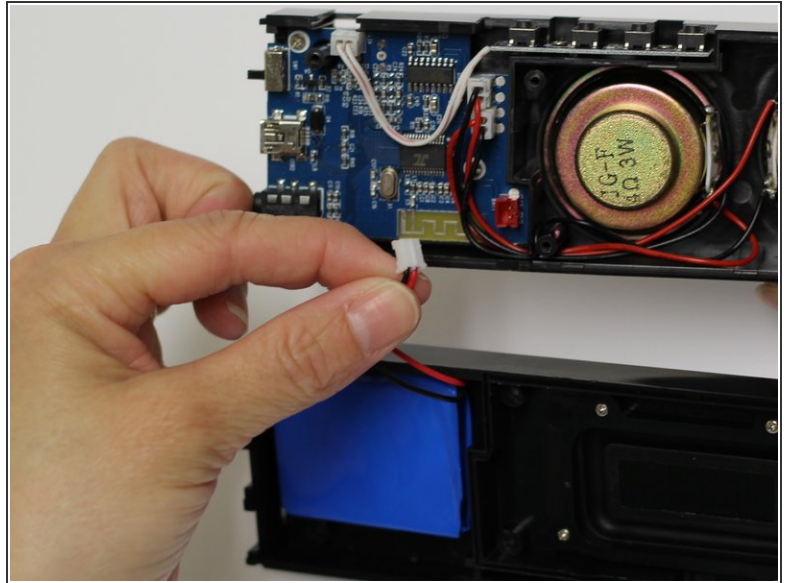

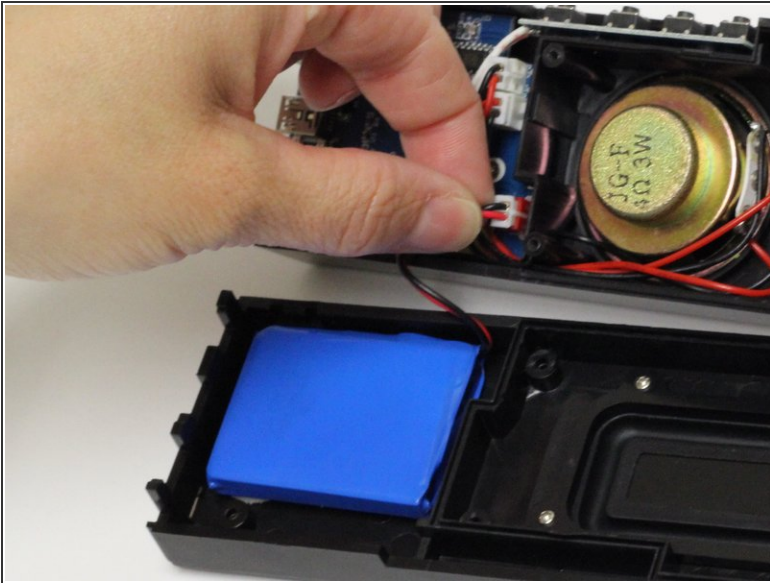

- Remove the five 1 cm screws on the back side (opposite of the speakers) of the device using a Phillips #1 screwdriver.

## Step 6

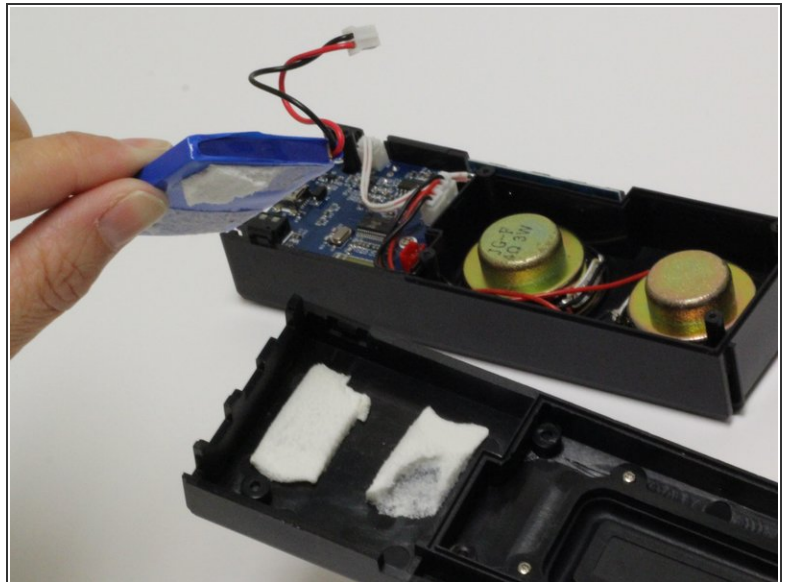

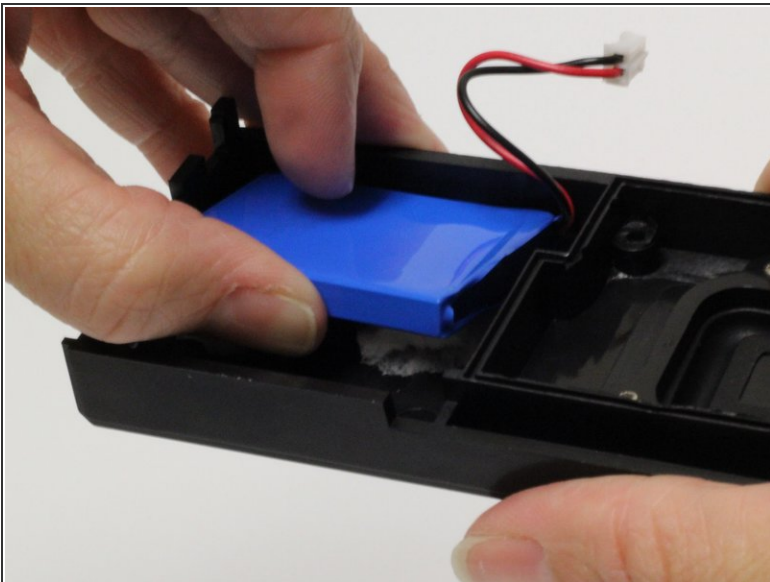

- Gently pull apart the two sections of the device.

## Step 7 — Battery

- Pull the wires connecting the blue battery out of the circuit board.

## Step 8

- Using your fingers, pull the blue battery out of the casing.
- ⓘ There might be slight hesitation due to the adhesive attaching the battery to the casing, so a slight bit of force might be necessary.

To reassemble your device, follow these instructions in reverse order.
