

# Cineyo BT-03 Device Speaker Replacement

This guide will allow you to replace the speaker(s).

Written By: Rene Klop

---

# INTRODUCTION

This guide will take you step by step through the process of replacing your speakers.

---

## TOOLS:

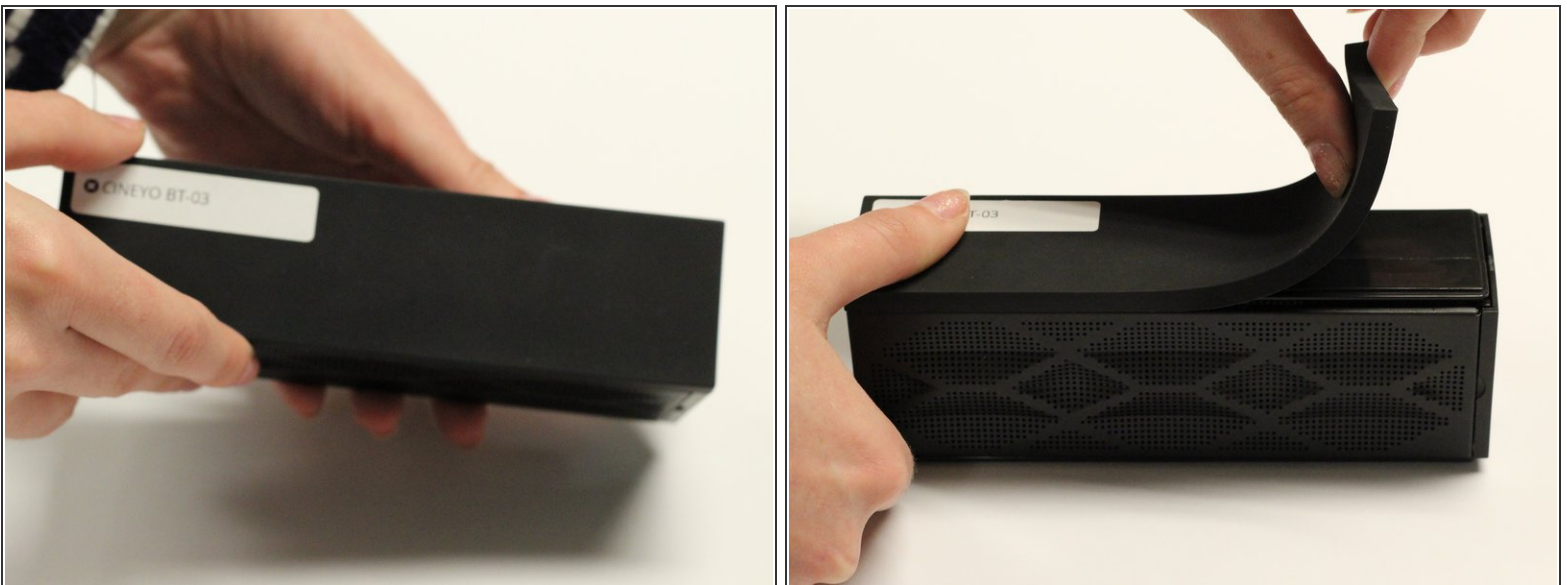

- [Phillips #1 Screwdriver](#) (1)
  - [Portable Soldering Iron](#) (1)
-

## Step 1 — Cineyo BT-03 Device Disassembly

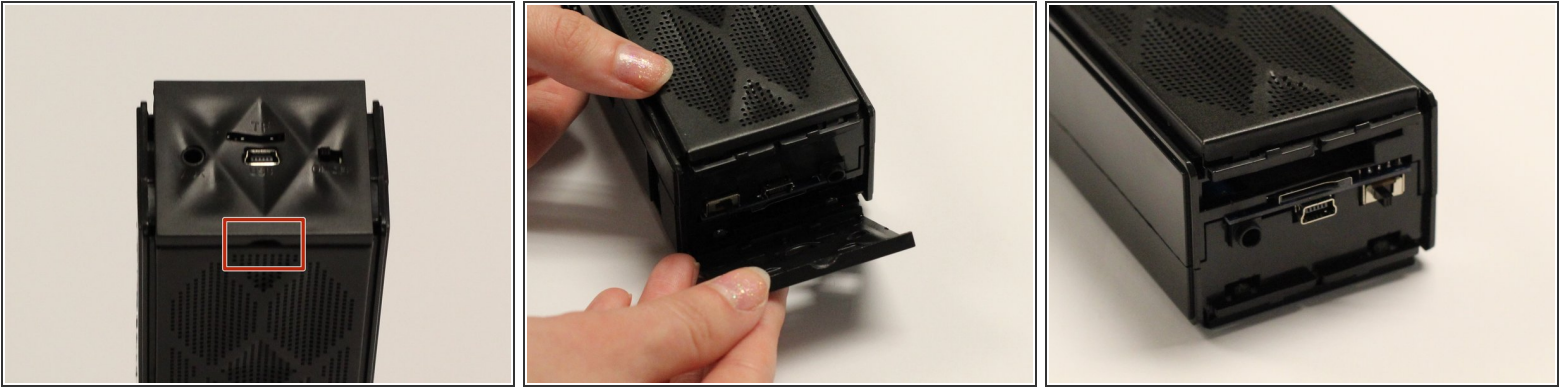

- Remove the top (button side) rubber cover using your hands.

## Step 2

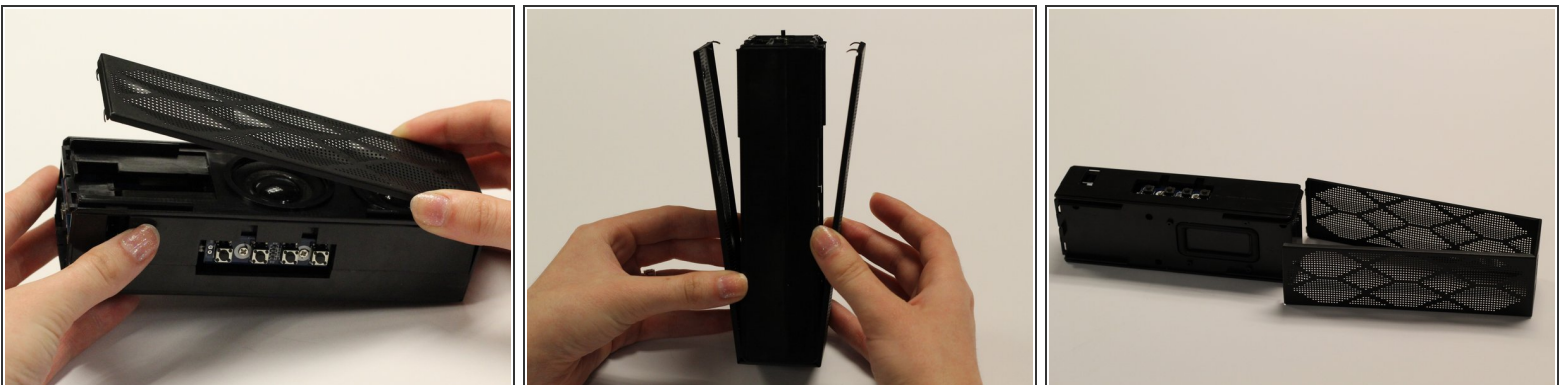

- Flip over the device and remove the bottom rubber cover using your hands.

## Step 3

- Using your hands, pull off the plastic side cover (on the side with the audio jack) using the indented tab. The indented tab has been highlighted in the picture.

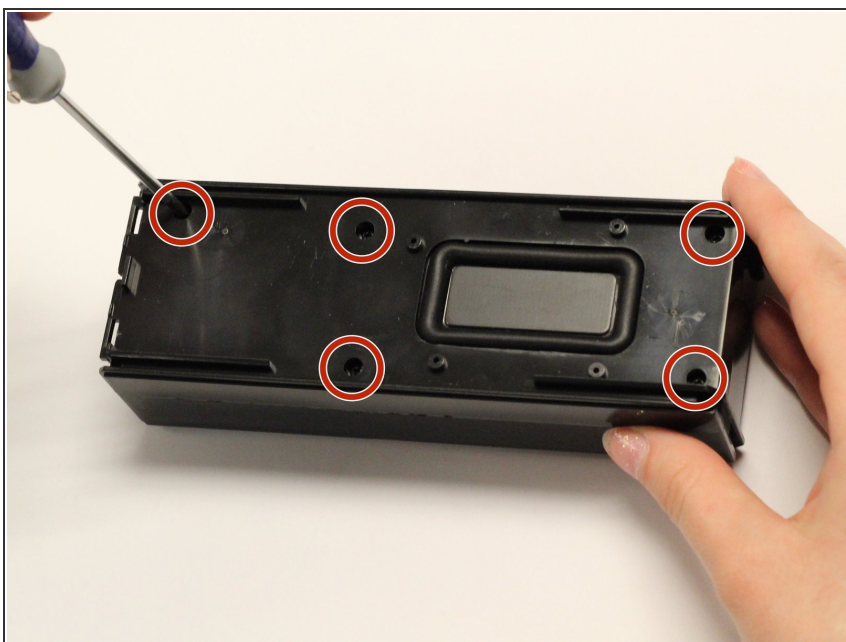

## Step 4

- Detach the plastic speaker cover on both the front and back sides. Then slide the cover off of the device.
- ⓘ The cover should remain as one solid piece.

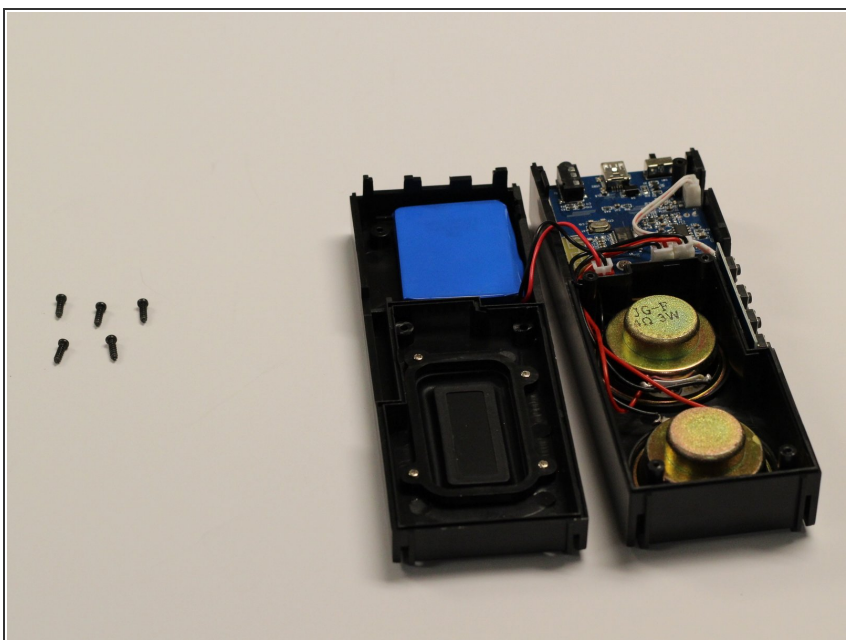

## Step 5

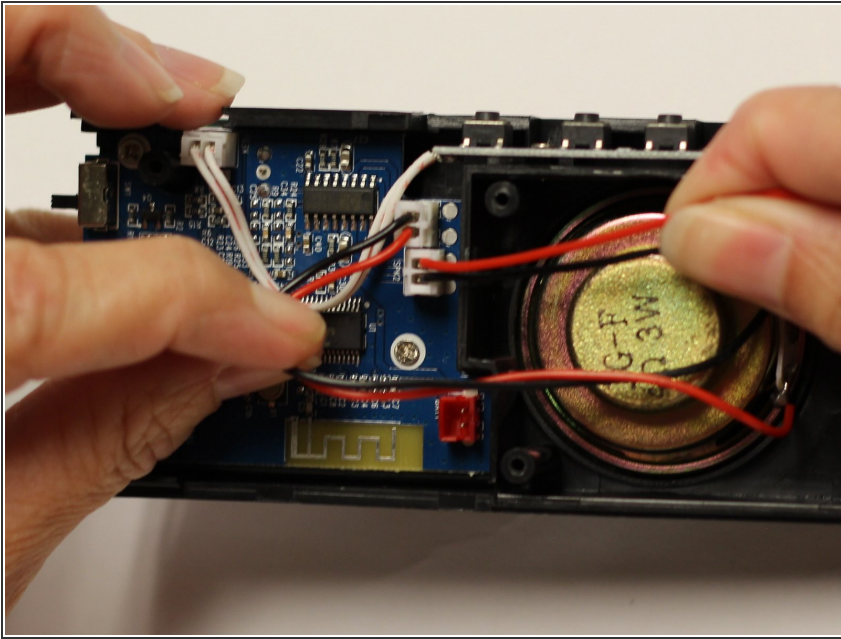

- Remove the five 1 cm screws on the back side (opposite of the speakers) of the device using a Phillips #1 screwdriver.

## Step 6

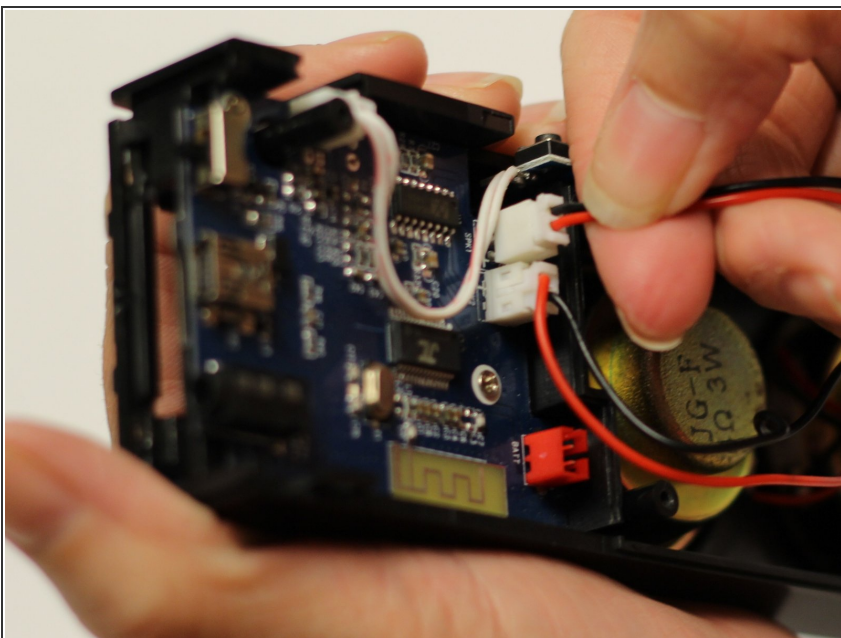

- Gently pull apart the two sections of the device.

## Step 7 — Speaker

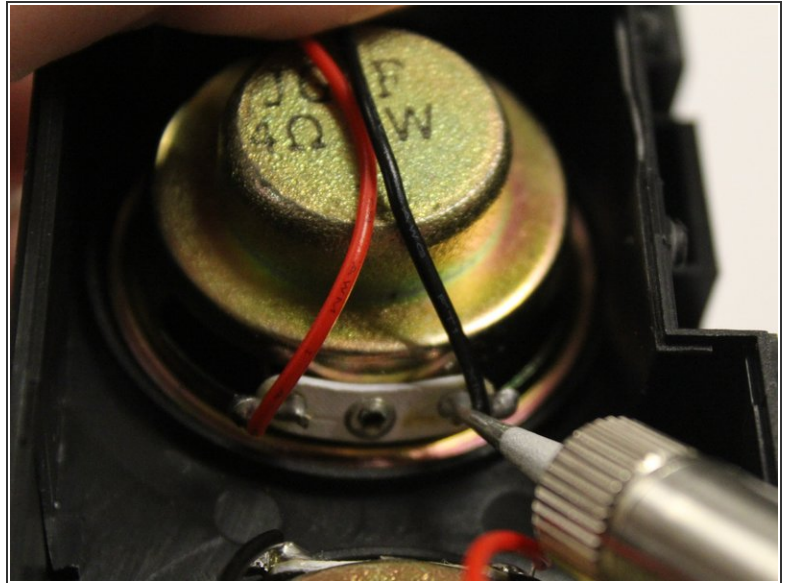

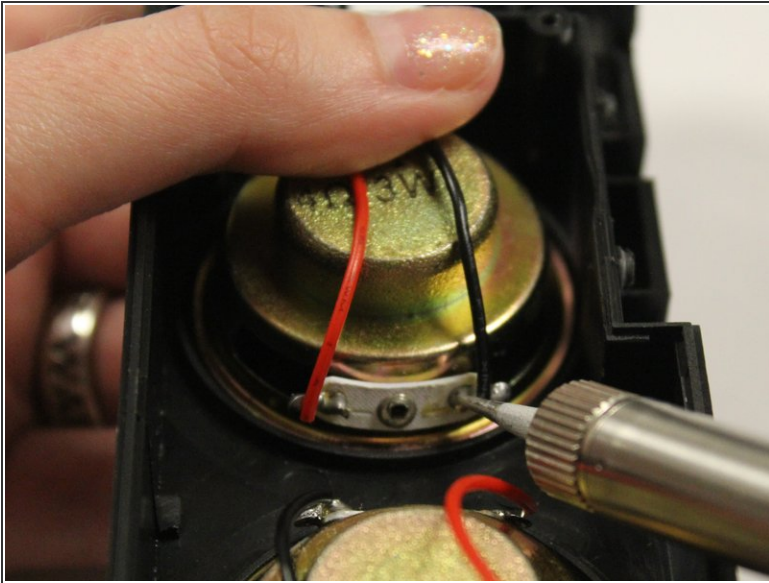

- Separate the wires so that each white cap distinctly has a single red and single black wire coming out of it.
- ⓘ This is to make it safe and easy to disconnect the wires.

## Step 8

- Disconnect the two sets of wires by pulling on the wires until the white cap detaches from the circuit board.
- ⓘ Make sure to leave the white casing attached to the circuit board.

## Step 9

- Detach the solder points on each gold speaker in order to release and remove them.

 For help soldering, please review iFixit's [Soldering Guide](#).

To reassemble your device, follow these instructions in reverse order.
