

# Classen Sod Cutter SC18AHDCA 2019 Guard Panel Replacement

How to remove and replace the right guard panel for the Classen Sod Cutter SC18AHDCA.

Written By: Arthur Shi

# INTRODUCTION

Follow this guide to remove the right guard panel for the Classen Sod Cutter SC18AHDCA in order to replace it or access the belt drive.

## TOOLS:

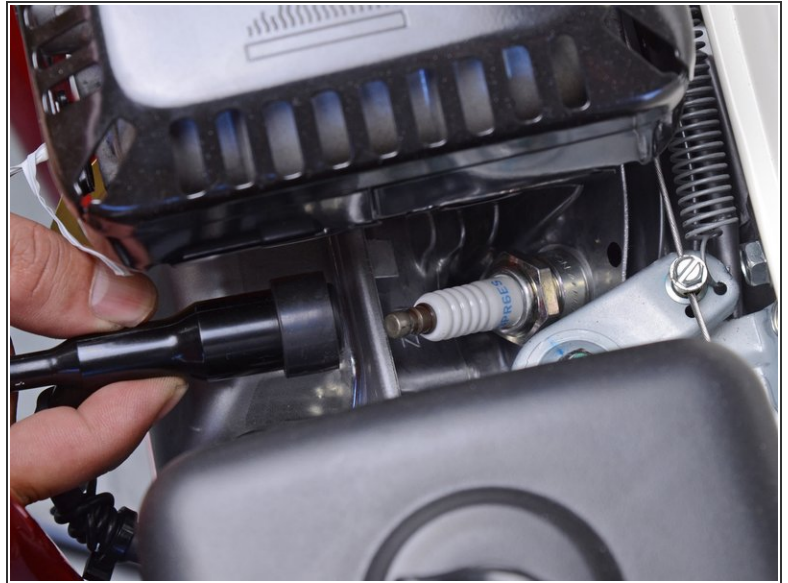

- [Wheel Chocks](#) (1)
- [1/2" Socket](#) (1)
- [Socket Wrench](#) (1)

## PARTS:

- [Classen S-Large Guard 4171985](#) (1)

## Step 1 — Safety precautions

 Before you begin, make sure that the machine is turned off.

 For safety purposes, disconnect the spark plug.

- Grab the plastic housing at the end of the spark plug wire.
- Pull firmly to disconnect the wire from the spark plug.

## Step 2

- Place wheel chocks against the roller and rear wheel to prevent the machine from moving.

## Step 3 — Position the blade

- Use your hand to slowly rotate the blade pulley so that the blade is pulled back as far as possible.

## Step 4 — Unscrew the right guard panel

- Use a 1/2" socket wrench to remove the nine 1 inch-long bolts securing the right guard panel:
  - Two bolts on the front of the panel
  - Five bolts on the top of the panel
  - Two bolts on the back of the panel

## Step 5 — Remove the guard panel

- Slide the guard panel forward until the panel clears the black blade arm.
- Swing the panel outward to clear the screw post.
- Remove the panel.

To reassemble your device, follow these instructions in reverse order.
