

ClickN Kids Tablet Battery Replacement

This is a guide for replacing the battery in the device

Written By: Kevin Finney

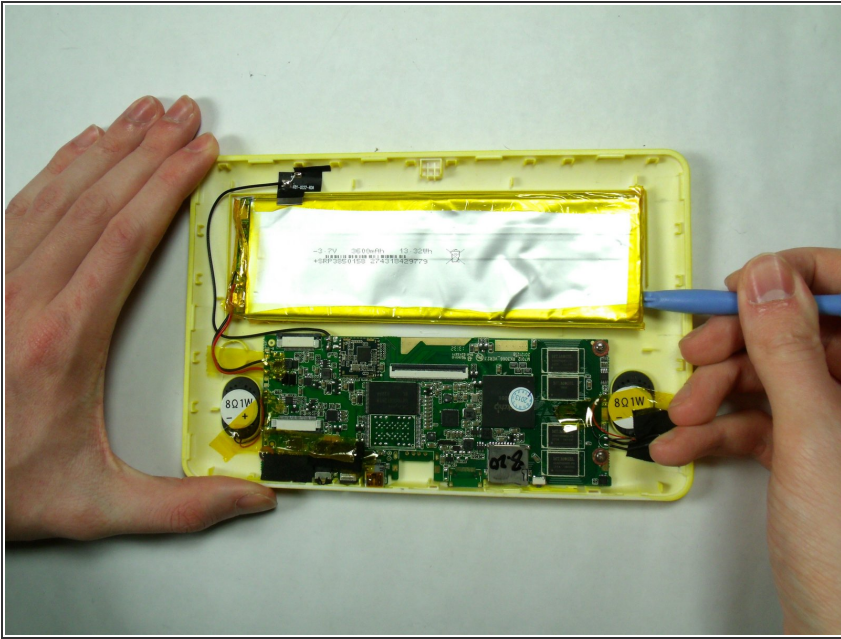

TOOLS:

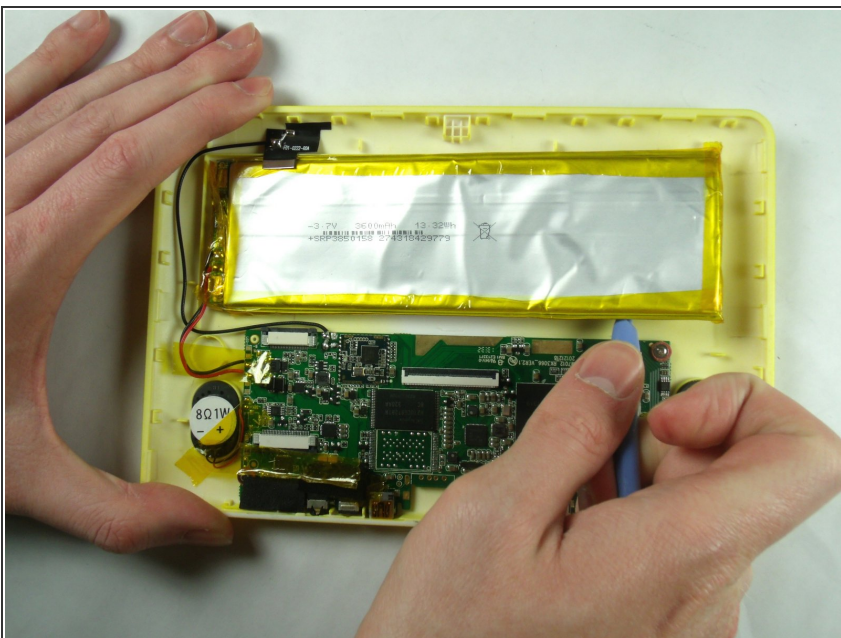

- [iFixit Opening Tools](#) (1)
 - [Soldering Iron](#) (1)
-

Step 1 — Battery

- Follow the [camera replacement guide](#) to access the battery.

Step 2

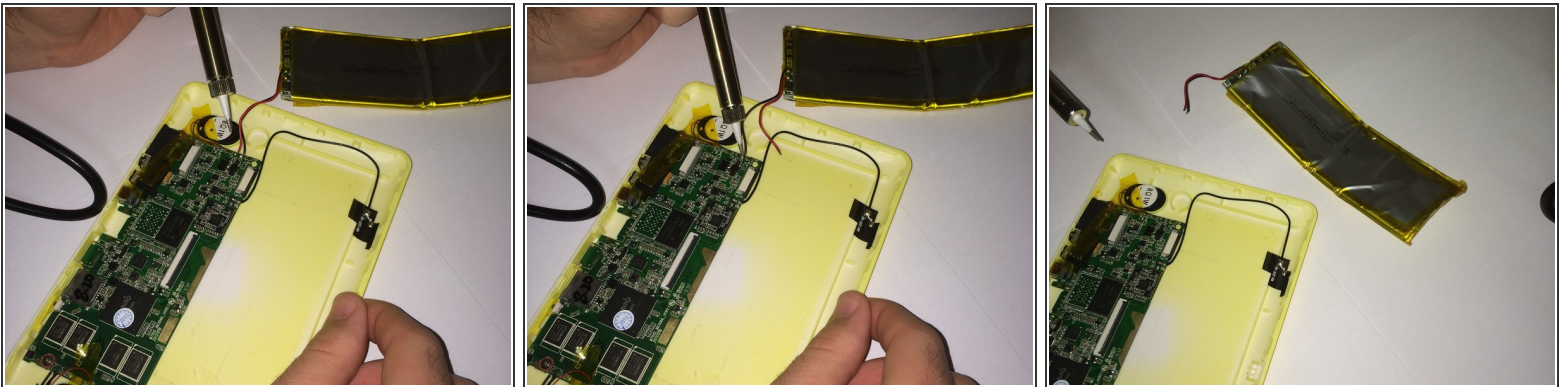

- ⓘ The battery is connected to the back side by a strong adhesive.
- ⓘ The battery may bend during this process.
- ⚠ Be careful not to damage the wires or the black tab attached to the battery.
- ⚠ Be careful not to allow the battery to bend any more than necessary. Battery acid leakage is possible.
- Pry the battery off the back side with a plastic opening tool.

Step 3

- Pull the tape off the side with the wires and circuit piece.

Step 4

- ⓘ Have someone who is skilled in soldering to perform this step.
- ⚠ Be careful not to destroy the motherboard or other parts of device.
- Desolder the wires connecting the battery to the motherboard from the contact points on the motherboard.

To reassemble your device, follow these instructions in reverse order.
