# Compaq Presario v2000 Display Panel Replacement

How to remove and replace the LCD display panel

Written By: Andrew
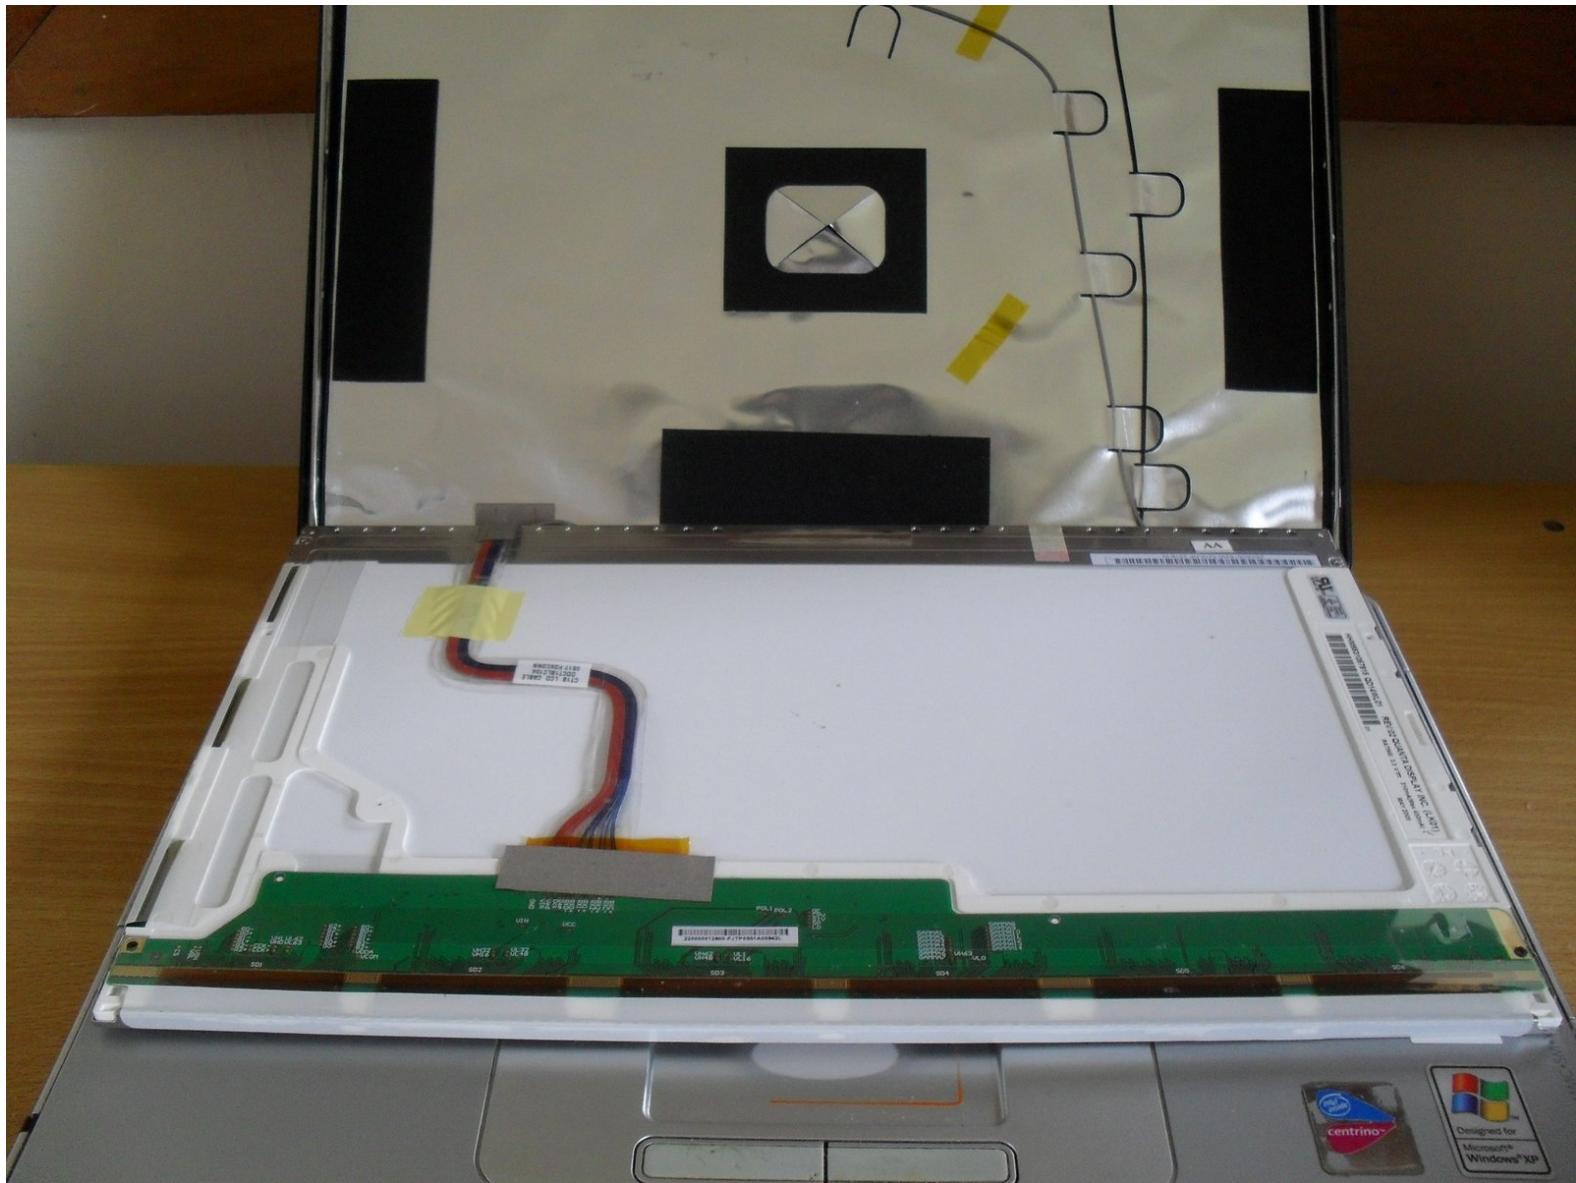

INTRODUCTION

How to remove and replace the LCD display panel

TOOLS:

- Phillips #1 Screwdriver (1)
- Spudger (1)

This document was generated on 2019-09-19 08:17:51 PM (MST).

Step 1 — Display Panel

📌 Remove the battery before starting working on the laptop

Step 2

- There are 6 screws holding on the display bezel, hidden behind screw covers

- Remove the screw covers with a spudger or small flat blade screwdriver

- Remove the screws with a phillips #1 screwdriver

Step 3
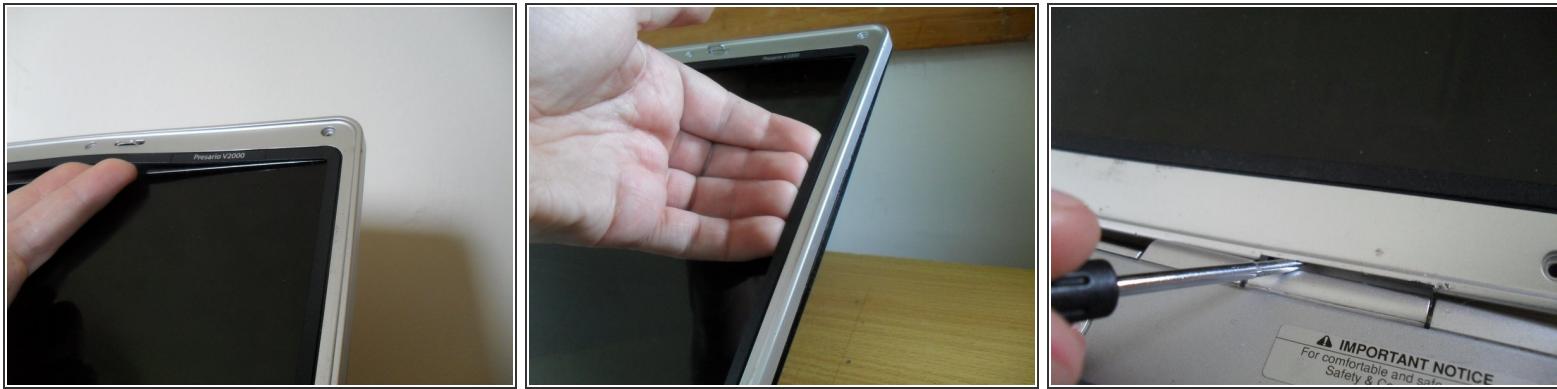

- Use your fingers to pry off the bezel at the top and sides first

⚠ Don't use anything hard and sharp as you may damage the panel

- You may need to use a spudger or flat blade screwdriver at the bottom edge around the hinges

Step 4
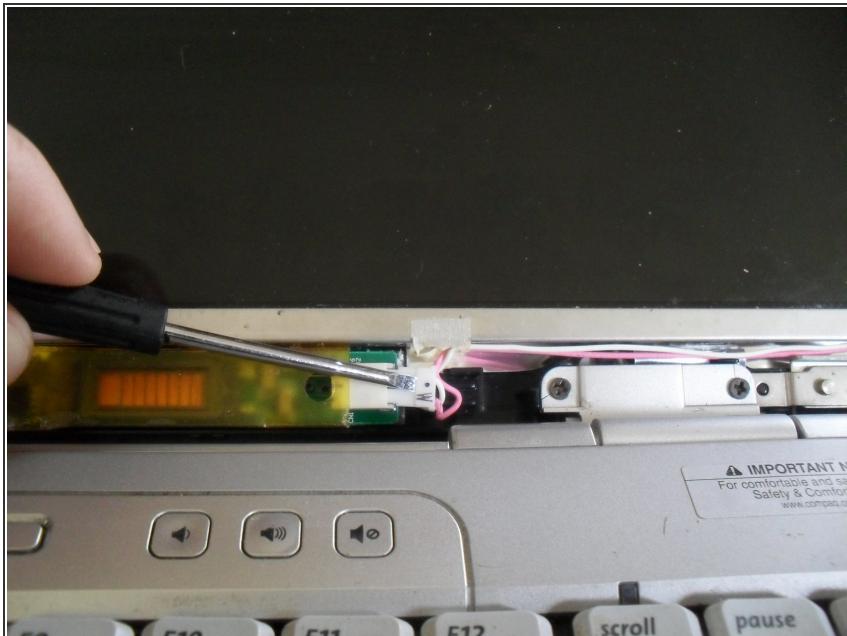

- Remove the backlight inverter cable using a spudger or flat blade screwdriver

Step 5
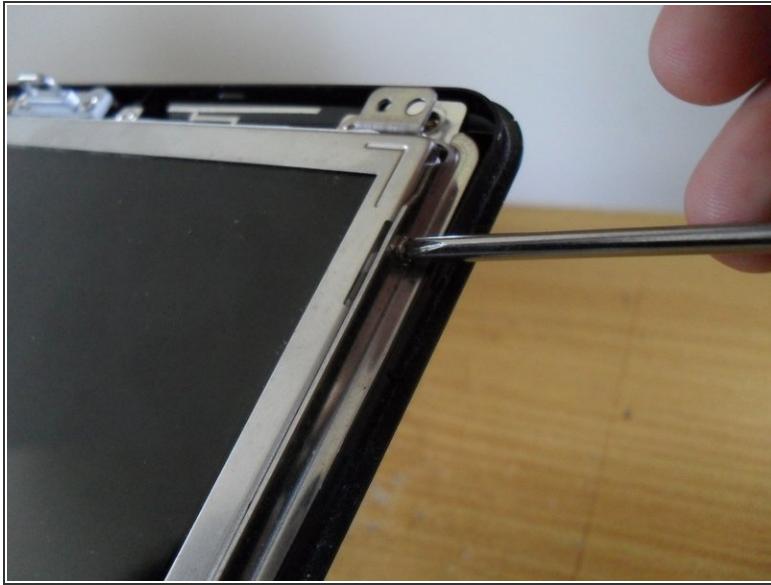

- Remove the two side screws at the top of the panel first

- Then remove the two side screws at the bottom. It may be necessary to angle the display away from the back cover to reach these well

⚠ Hold on to the display when removing the last screw, there is still a cable on the back to remove

Step 6
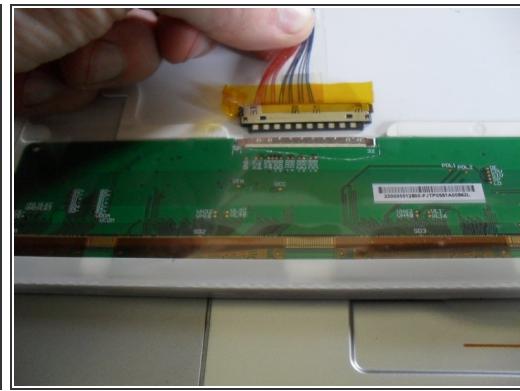

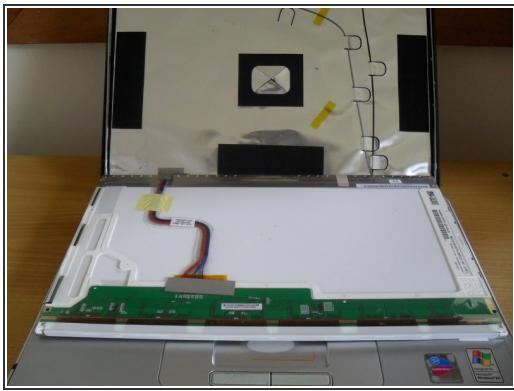

- Lay the panel down on the keyboard

- Remove the tape covering the display cable connecter

- Remove the display cable from the panel
