Step 1 — Front and Back Cover

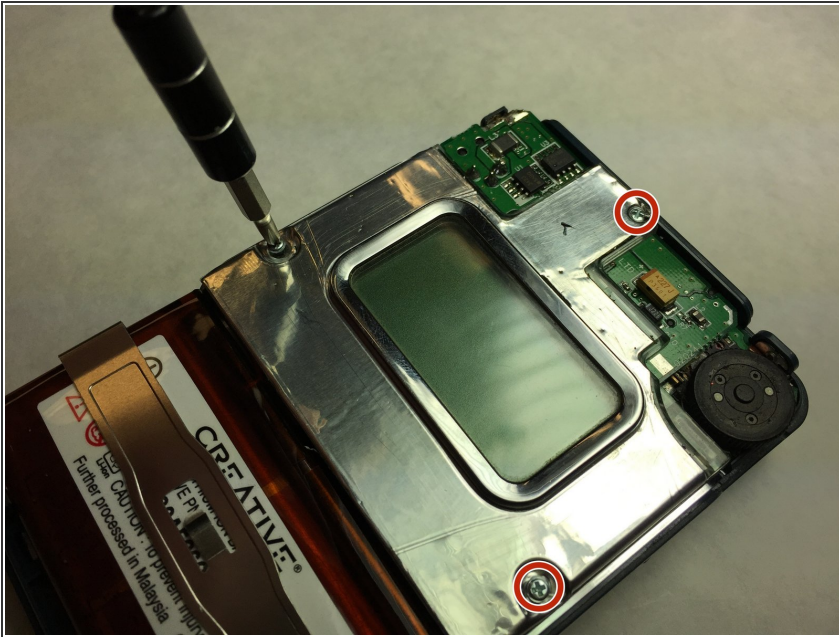

- Use a J0 screwdriver to remove the eight 3.5mm screws.

Step 2

- Use the plastic opening tool to open the top cover by carefully prying at each corner.

Step 3 — Screen Cover

- Once the front face is removed, remove the three 6.8mm J0 screws from the metal cover and remove it.

Step 4 — Display Screen

- Using the plastic opening tool to pop the metal tab holding the battery in place.

⚠️ By breaking the sticker, it could void your warranty

Step 5

- Use the spudger tool to unclip the screens wiring pigtail clipped into the motherboard.
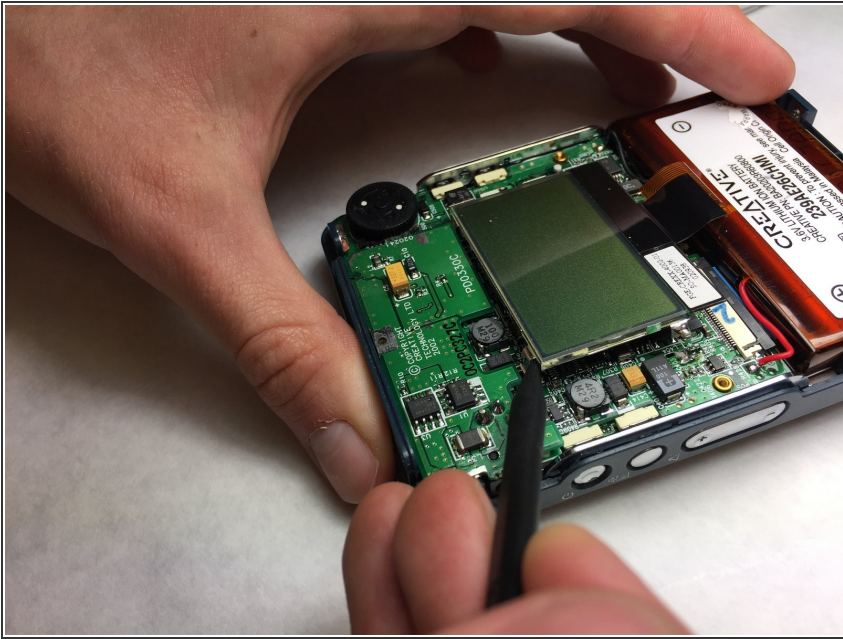

Step 6

- Use soldering iron to melt the solder used to hold the display screen to the motherboard.

- ⚠ Using soldering gun with care as it becomes extremely hot and can cause burns.

Step 7

- Using the spudger tool, gently pry up the corners of the display screen to remove it.

To reassemble your device, follow these instructions in reverse order.
