Creative Zen Vision M Screen Replacement

If your screen is flickering, blacked out, or cracked, this guide will assist you.

Written By: Kirstie G

INTRODUCTION

This guide demonstrates how to replace a screen. You will need a one mm Phillips head screwdriver. Keep in mind that the Creative Zen Vision was released in 2005 and discontinued shortly after that. So it may be difficult to obtain a new screen to use as a replacement.

TOOLS:

- Flathead Screwdriver (1)
- 1mm phillips head screwdriver (1)
- Phillips #0 Screwdriver (1)

Step 1 — Opening the top

- Pop off the top plastic on the device with a flat tool like a flathead screwdriver.

- Unscrew and remove the two exposed Phillips head screws.
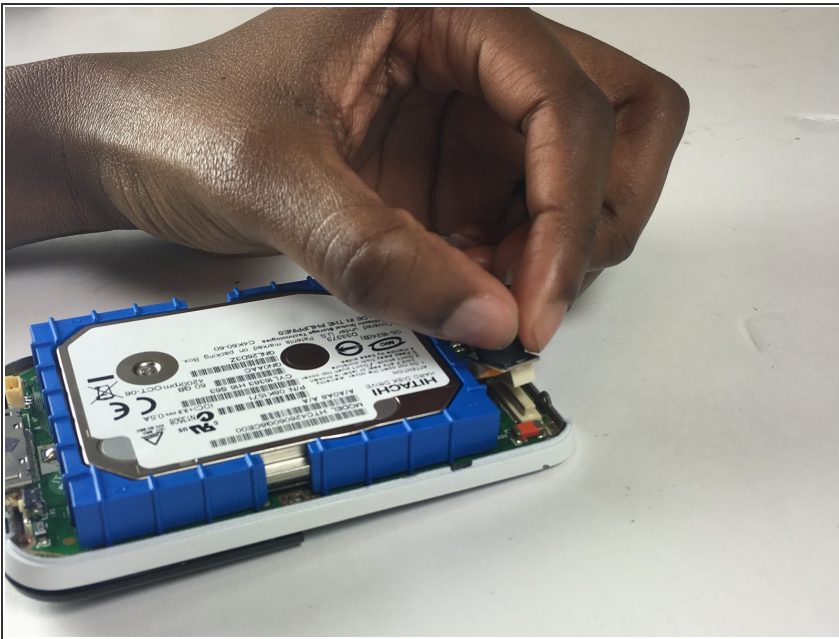

Step 2 — Opening the device

- Work your way around the recess of the device with a flat tool like a flathead screwdriver.

- Don't try attempt to open it from the recess between the buttons and the device.

Step 3 — Disconnecting the battery

- Disconnect the wire from the bottom device.

- Handle with care as the wires tend to disconnect easily.
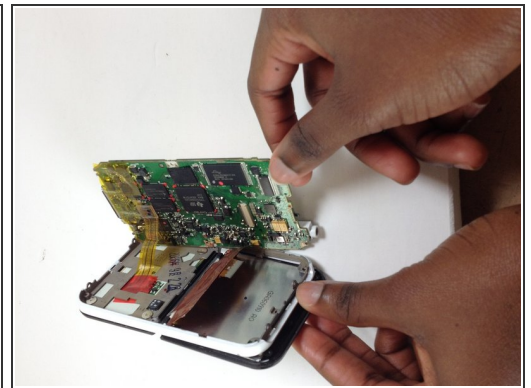

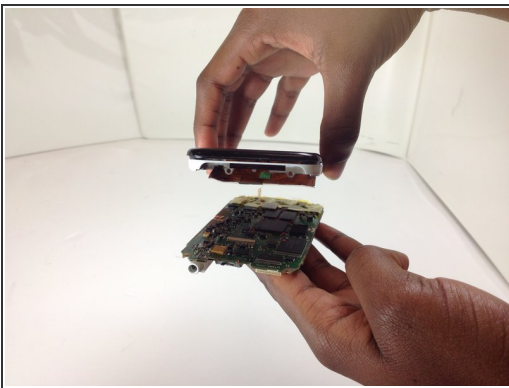

Step 4 — Disconnecting the hard drive

- In the top right corner, pull the black foam square off to separate the hard drive from the screen.

- Handle with care as the hard drive also comes off easily.

Step 5 — Unscrewing from the mother board

- Unscrew the seven screws placed around the mother board.

- You will need a one millimeter Phillips head screwdriver.

- The screws are small, so keep them safely.

## Step 6 — Disconnecting the screen from the motherboard

- Flip your device upside down so that the motherboard will loosen.

- Detach the connector from the motherboard.

Step 7 — Removing the screen

- Tilt the screen diagonally. Separate the screen and motherboard from the device frame.

- Lift the light gray flap to detach the screen from the motherboard.

Step 8 — Seperating the digital display

- Separate the clear screen frame from the digital display.
