

# Creative Zen Vision W LCD Screen Replacement

This guide will show you how to remove and install a new LCD screen in your device.

Written By: Tim Wilson

## INTRODUCTION

This guide will show you how to remove and install a new LCD screen in your device. Use this guide if your screen is broken or damaged and needs to be replaced.

### TOOLS:

- [Spudger \(1\)](#)
- [iFixit Opening Tools \(1\)](#)
- [Phillips #0 Screwdriver \(1\)](#)

## Step 1 — Front Cover

- Remove 2 screws (2.5 mm) on the top of the device using Phillips #0.

## Step 2

- Remove 2 screws (2.5 mm) on the bottom of the device using a Phillips #0.

## Step 3

- Use a spudger to get between the cover and the screen. Carefully lift the cover off of the screen without putting too much pressure on the screen.
- When the cover has been lifted off the screen, use your hands to remove it from the device.
- The button pad may fall off when the cover is removed.

## Step 4 — LCD Screen

- Use a spudger to separate the metal tabs that hold the screen in place on the right side.

**⚠** The screen is still attached underneath with two ribbon cables. Lift it very carefully.

## Step 5

- Put the screen face down so you can see where the ribbon cables are attached.
- Remove the red sticker that covers the ribbon cable connections.

## Step 6

- Use a plastic opening tool to get underneath the black flap on the larger ribbon cable connection and lift it.

## Step 7

- Use a spudger to slide the two small gray tabs away from the ribbon cable connection.
- Remove the screen from the device.

To reassemble your device, follow these instructions in reverse order.
