

Cube U30GT Disassembly

dismantling of the cube tablet U30GT

Written By: DaZzler

Step 1 — Cube U30GT Disassembly

- Unscrew the side support to separate the back and front

Step 2 — Separation of the two parts

- Once the side protection has been removed, we can separate it.

Step 3 — Metal protection

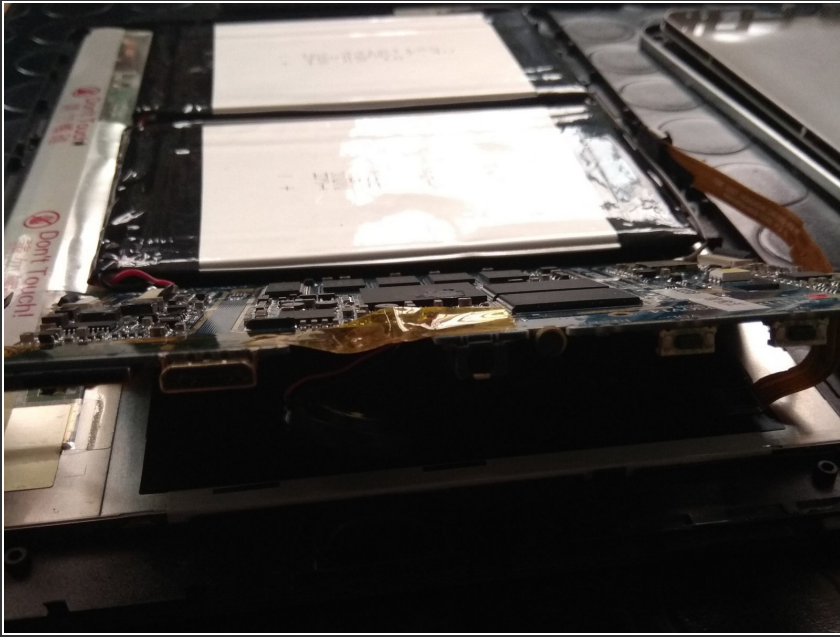

- Once the back part has been removed, we have to unscrew the metal protection.

Step 4 — Unplugging components

- Once the metal protection has been removed, we must disconnect the components such as the camera.

Step 5 — Lifting plate

- Once all the cables of the PCB have been disconnected, we can lift the plate.

Step 6 — Remove screen

- Once the plate is separated we can remove the part of the screen.

To reassemble your device, follow these instructions in reverse order.
