

Cuisinart DLC-10S Pro Classic 7-Cup Food Processor Internal Wiring Replacement

This guide will help you accomplish replacing faulty wires within your device.

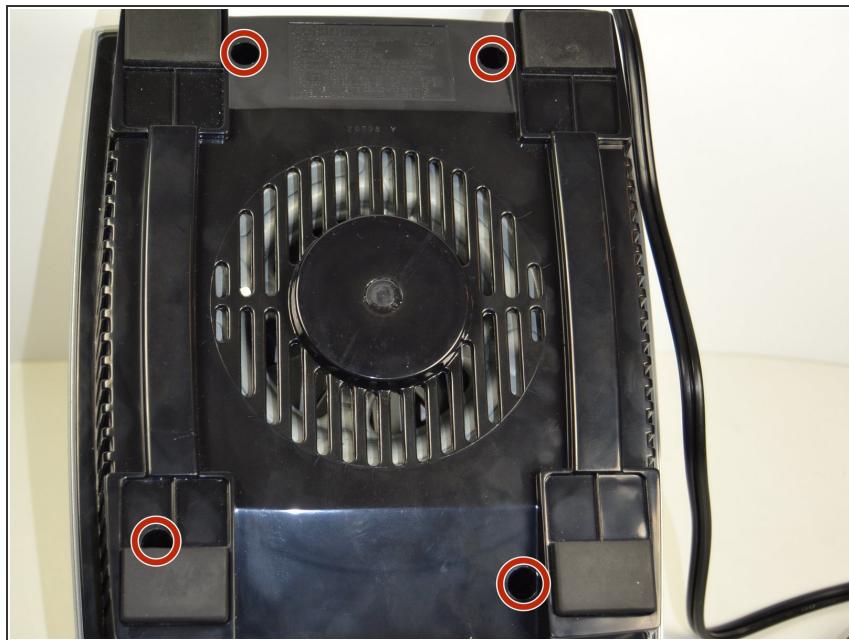

Written By: Riley Carns

 **TOOLS:**

- [Wire stripper/crimping tool \(1\)](#)
- [Phillips #2 Screwdriver \(1\)](#)
- [Flush Wire Cutters \(1\)](#)

Step 1 — Internal Wiring

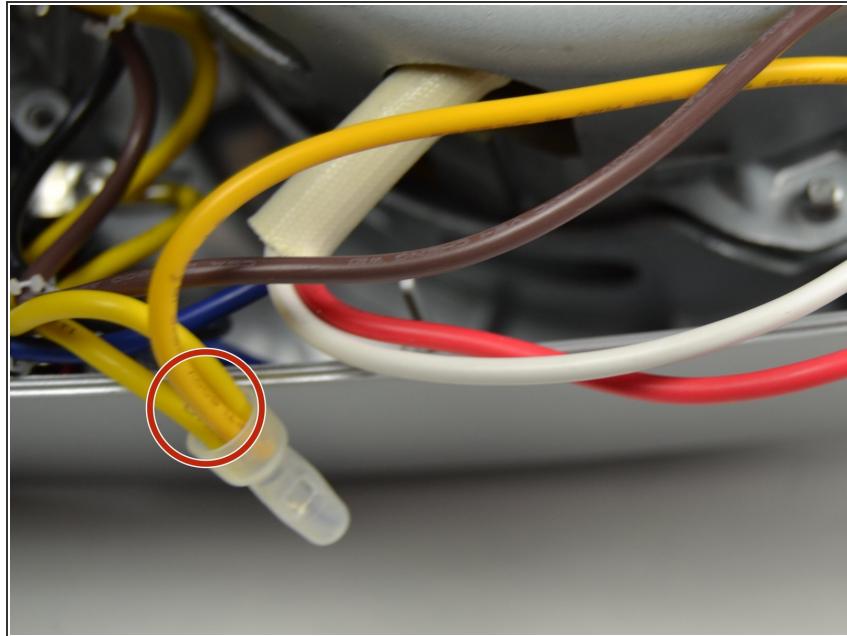

- Remove the four screws from the bottom of the processor with a Philips Screwdriver.

Step 2

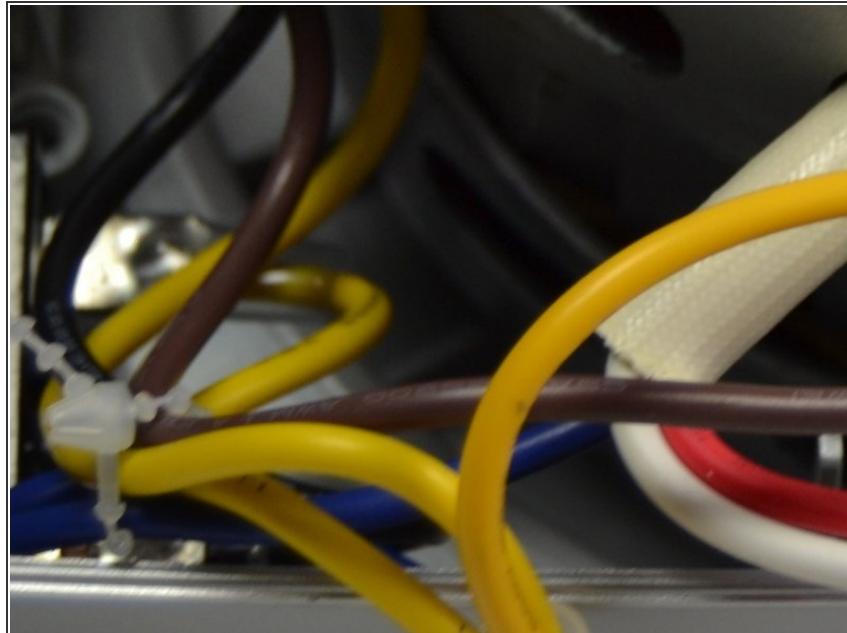

- Remove the bottom casing of the processor.

Step 3

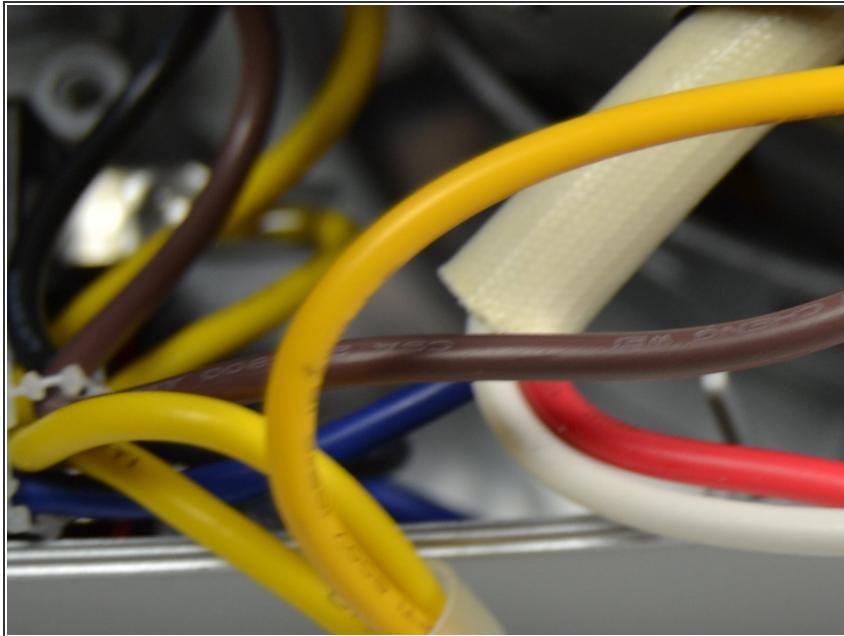

- If any wires are frayed, cut them off where they are connected by wire nuts.

Step 4

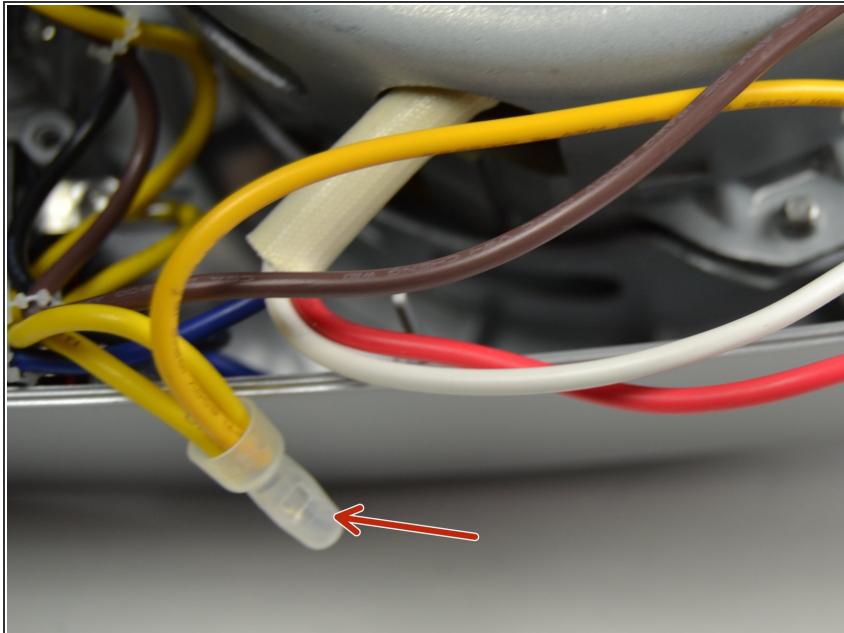

- Detach the wire nut from the other connected wires.

Step 5

- Replace the bad wire with a new one of the same gauge.

Step 6

- Strip the new wire to the same length as the other wires and connect them to a wire nut.

To reassemble your device, follow these instructions in reverse order.
