## INTRODUCTION

In this ifixit tutorial, the easy process behind the removal of the protective speaker grille on your DOSS SoundBox will be explained. This straightforward one step process should take no more than 5 minutes. Enjoy, and happy fixing!

### TOOLS:

- [iFixit Opening Tools](#) (1)
-

## Step 1 — Grille Removal

- Use a small plastic opening tool to gently lift the side of the grille.
- Gently slide the tool to the front of the speaker.
- Repeat the process on the bottom of the grille.
- Gently pull the grille off of the speaker enclosure.

 Pry with caution, for the grille is fragile.

To reassemble your device, follow these instructions in reverse order.
