## Step 1 — Finding a workspace

- Be sure to repair your device on a clean surface so you are less likely to lose small parts.

Step 2 — Pry open your tablet

- Run your prying tool along the front edge of the device to pop off the front cover.

- Once the halves are separated your device should look like this.

- (HINT: be careful of the device's small wiring when separating the two halves.

## Step 3 — Removing the tape around the battery

- Remove the black tape.

⚠ (HINT: be careful not to remove the tablet camera.)

- Your tablet should look like photo 3 after you have removed the tape.
Step 4 — Removing the Battery

- Pry off the battery, be careful not to break the battery.

- Use soldering iron or gun to remove the battery from both its attachment points.

Step 5 — Replacing the Battery

- Insert your replacement battery in the same spot as the old battery.

- Tape battery into place.

Step 6 — Closing the Tablet

- Solder the new battery to the connection points.

- Press the back cover on firmly till it clicks
