

# DeWALT Hammer Drill DW511 Back Cover Replacement

How to replace the DeWALT Hammer Drill DW511 back cover.

Written By: Kristen Gismondi

## TOOLS:

- [T20 Torx Screwdriver](#) (1)
  - [iFixit Opening Tools](#) (1)
-

## Step 1 — Back Cover

- Remove three 19mm T20 Torx screws from the back of the drill.

## Step 2

- Place an opening tool in the groove line of the handle and pop the back loose.
- Grab the drill with two hands and pull the cover off.

To reassemble your device, follow these instructions in reverse order.
