

DeWalt DC970 Forward/Reverse switch Replacement

This guide will walk you through how to replace a broken forward/reverse switch for this device.

Written By: jake

INTRODUCTION

This guide will teach you how to properly replace your forward/reverse switch for this device.

TOOLS:

- T15 Security Torx Screwdriver (1)
- Torque Wrench (1)

Step 1 — Battery

- Compress the buttons on either side of the battery and lift the drill away from battery.

Step 2

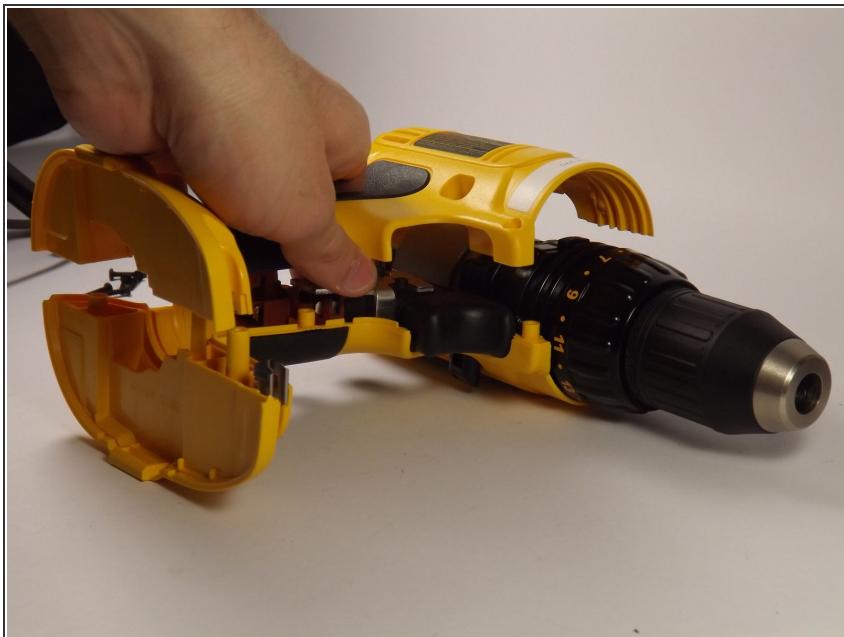

- Remove battery from drill.

Step 3 — Drill Assembly

- Remove the eight 16 mm, Torx Security #15 screws.

Step 4

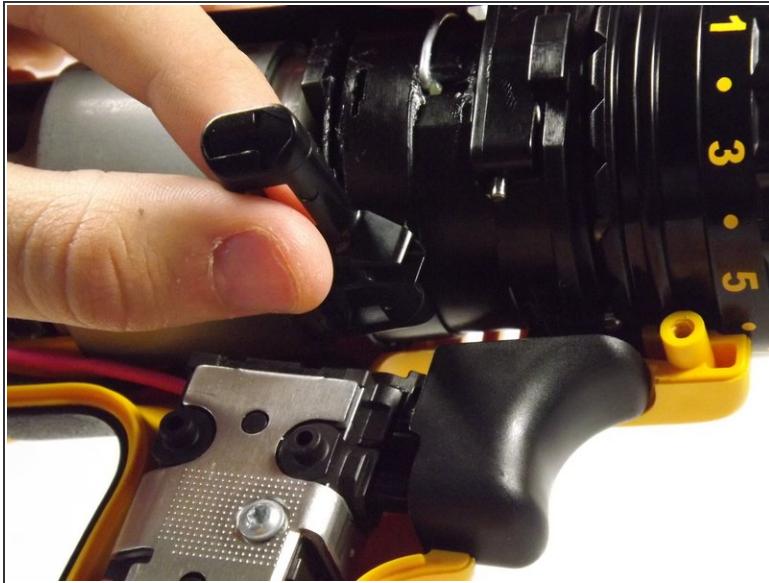

- Lay the drill on its side and gently lift the top half off it.

Step 5 — Forward/Reverse switch

- Remove the drill mechanism from the shell.

Step 6

- Disconnect the forward/reverse switch from the trigger by pulling the mechanism out and leaving the switch in the frame.
- To replace just pull the switch out and put the new one in the opening.

To reassemble your device, follow these instructions in reverse order.
