

# DeWalt DCS380 shoe and boot removal

Removal of DCS380 shoe and boot.

Written By: Jonathan Hicks

---

## INTRODUCTION

Disassembly of shoe and boot for later repair of gearbox or blade release lever.

---

### TOOLS:

- [T20 Torx Screwdriver](#) (1)
-

## Step 1 — Removing shoe and boot.

- ❗ Remove the battery before disassembly.
- Remove the shoe by pressing the yellow button on the left side of the hand grip.

## Step 2

- Remove the two M8x18mm T20 bolts from the front plate.

### Step 3

- Pull the front of the grip while holding the saw body in place.

To reassemble your device, follow these instructions in reverse order.
