INTRODUCTION

This guide will show the user how to replace a cracked, broken, or damaged base panel on the Dell Alienware 13 laptop.

TOOLS:

- Heavy-Duty Spudger (1)
- Phillips #1 Screwdriver (1)

Step 1 — Base Panel

⚠ Working on an electrical device while plugged in can cause injury due to electrical shock. Ensure that all external power is disconnected from the device.
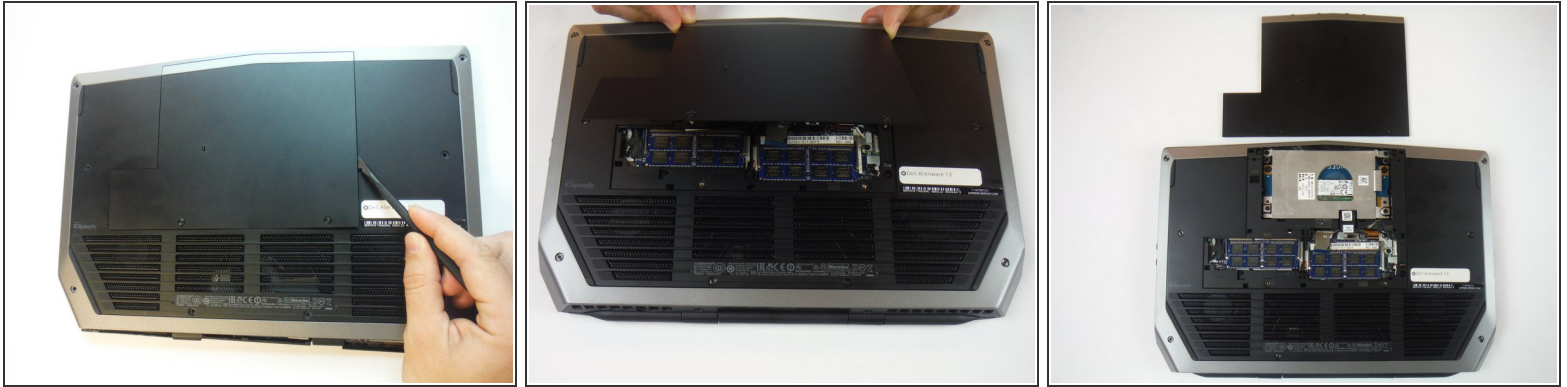

● Close the device and turn the device over.

Step 2

● Remove (2) 5 mm Phillips head screws attaching the small access panel to the base using a Phillips # 1 screwdriver.

ⓘ The (2) screws are attached to the base panel with retaining clips and won't completely detach from the panel.

Step 3

- Remove the small access panel using a heavy duty spudger.

To reassemble your device, follow these instructions in reverse order.
