## INTRODUCTION

In this guide, we will show you how to remove and replace the Display Bezel.

### TOOLS:

- Pro Tech Toolkit (1)

## Step 1 — Turning Over the PC

**WARNING:** Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before Working Inside Your Computer](#). After working inside your computer, follow the instructions in [After Working Inside Your Computer](#). For more safety best practices, see the regulatory compliance home page.

- Close the display and turn the computer over.

## Step 2 — Loosen the screws

1 computer base

3 base panel

2 captive screws (2)

4 plastic scribe

- Loosen the captive screws that secure the base panel to the computer base.

## Step 3 — Releasing the Tabs

- Using a plastic scribe, gently release the tabs that secure the base panel to the computer base.

## Step 4 — Disconnecting the Battery Cable

- Disconnect the battery cable from the battery-cable connector.
- Turn the computer over.

## Step 5 — Power Button

- Press and hold the power button for 5 seconds to ground the system board.

## Step 6 — Connect the Battery Cable

- Connect the battery cable to the battery-cable connector.

## Step 7 — Aligning the tabs

- Align the tabs on the base panel with the slots on the computer base and snap the base panel into place.

## Step 8 — Tighten the screws

- Tighten the captive screws that secure the base panel to the computer base.

## Step 9 — Removing the Screws

**⚠ WARNING:** Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before Working Inside Your Computer](#). After working inside your computer, follow the instructions in [After Working Inside Your Computer](#).

- Remove the screws that secure the solid-state drive bracket to the solid-state drive assembly.

## Step 10 — Peel off Computer Base Tabs

- Using the pull tab, pivot the solid-state drive bracket and peel off the bracket from the tabs on the computer base.

## Step 11 — Disconnecting the Solid-State Drive Cable

- Using the pull tab, disconnect the solid-state drive cable from the system board.

## Step 12 — Removing the Solid-State Drive

- Remove the screws that secure the solid-state drive assembly to the computer base.

## Step 13 — Lifting the Solid-State Assembly

- Lift the solid-state drive assembly off the computer base.

## Step 14 — Remove the Screw

- Remove the screw that secures the solid-state drive to the solid-state drive assembly.

## Step 15 — Lift the Solid-State Assembly.

- Slide and lift the solid-state drive off the solid-state drive assembly.

## Step 16 — The New Solid-State Drive

- Slide the **NEW** solid-state drive into the slot on the solid-state drive assembly.

## Step 17 — Screw Replacement

1 solid-state drive slots (2)  
2 solid-state drive  
3 solid-state drive assembly

- Replace the screw that secures the solid-state drive to the solid-state drive assembly.

## Step 18 — Align the Screws

- Align the screw holes on the solid-state drive assembly with the screw holes on the computer base.

## Step 19 — Replace the Screws

- Replace the screws that secure the solid-state drive assembly to the computer base.

## Step 20 — Connect the Cable to the System Board

- Connect the solid-state drive cable to the system board.

## Step 21 — Align the Screw Holes

- Align the screw holes on the solid-state drive bracket with the screw holes on the solid-state drive assembly.

1 pull tab

3 solid-state drive assembly

2 solid-state drive cable

4 screws (2)

## Step 22 — Replace the Screws

- Replace the screws that secure the solid-state drive bracket to the solid-state drive assembly.

## Step 23 — Lifting the Latches

- Lift the latches and disconnect the keyboard and keyboard-backlight cables from the system board.

## Step 24 — Remove the Screws

- Remove the screws that secure the palm-rest assembly to the computer base.

## Step 25 — Lift the Computer Base

- Lift the computer base slightly and push the release tabs on the palm-rest assembly until it pops out.

## Step 26 — Turning the Computer Over

- Turn the computer over and open the display as far as possible.

## Step 27 — Prying the Palm-Rest Assembly

- Using a plastic scribe, pry up along the edges of the palm-rest assembly.

## Step 28 — Lift the Palm-Rest Assembly

- Gently lift the palm-rest assembly and turn it over.

## Step 29 — Lift the Connector Latch

- Lift the connector latch and disconnect the power-button board cable from the system board.

## Step 30 — Lift the Palm-Rest Assembly

- Lift the palm-rest assembly off the computer base.

## Step 31 — Removing

- Remove the keyboard.
- Remove the power-button board.
- Remove the status-light board.
- Remove the Touchpad.

## Step 32 — Replacement

- Replace the touchpad.
- Replace the status-light board.
- Replace the power-button board.
- Replace the keyboard.

## Step 33 — Connecting the Power-Button Board Cable

- Connect the power-button board cable to the system board.

## Step 34 — Align the Palm-Rest Assembly

- Align the palm-rest assembly on the computer base and snap it into place.

## Step 35 — Close the Display

- Close the display and turn the computer over.

## Step 36 — Replace the Screws

- Replace the screws that secure the palm-rest assembly to the computer base.

## Step 37 — Connect the Keyboard Cable

- Connect the keyboard cable and the keyboard-backlight cable to the system board.

## Step 38 — Open the Display

**⚠️ WARNING:** Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before Working Inside Your Computer](#). After working inside your computer, follow the instructions in [Before Working Inside Your Computer](#).

- Open the display as far as possible.

## Step 39 — Remove the Screws

- Remove the screws that secure the hinge caps to the display hinges.

## Step 40 — Lifting the Hinge Caps

- Slide and lift the hinge caps off the display hinges.

## Step 41 — Close the Display

- Close the display and turn the computer over.

## Step 42 — Remove the Screw

- Remove the screw that secures the wireless-card bracket to the wireless card.

## Step 43 — Disconnect the Antenna Cables

- Disconnect the antenna cables from the wireless card.

## Step 44 — Turn the Computer Over

- Turn the computer over and open the display.

## Step 45 — Remove the Antenna Cables

- Remove the antenna cables from the routing guides on the display hinges.

## Step 46 — Disconnect the Display Cable

- Lift the connector latch and disconnect the display cable from the system board.

## Step 47 — Remove the Display Cable

- Remove the display cable from the routing guides on the display hinges.

## Step 48 — Disconnect the Logo-Board Cable

- Disconnect the logo-board cable from the system board and remove it from the routing guides on the display hinges.

## Step 49 — Remove the Screws

- Remove the screws that secure the display assembly to the computer base.

## Step 50 — Lifting the Display Assembly

- Lift the display assembly off the computer base.

## Step 51 — Align the Screw Holes

- Align the screw holes on the display hinges with the screw holes on the computer base.

## Step 52 — Replace the Screws

- Replace the screws that secure the display hinges to the computer base.

## Step 53 — Routing the Logo-Board Cable

- Route the logo-board cable through the routing guides on the display hinge and connect the logo-board cable to the system board.

## Step 54 — Route the Cable

- Route the display cable through the routing guides on the display hinge.

## Step 55 — Slide the Display Cable

- Slide the display cable into the connector on the system board and press down the latch to secure the cable.

## Step 56 — Route the Antenna Cables

- Route the antenna cables through the routing guides on the display hinges.

## Step 57 — Adhere the Adhesive Tapes

- Adhere the adhesive tapes that secure the antenna cables to the system board.

## Step 58 — Close the Display

- Close the display and turn the computer over.

## Step 59 — Connect the Antenna Cables

- Connect the antenna cables to the wireless card.

## Step 60 — Replace the Screw

- Replace the screw that secures the wireless-card bracket to the wireless card.

## Step 61 — Open the Display

- Turn the computer over and open the display.

## Step 62 — Align the Screw Holes

- Align the screw holes on the hinge caps with the screw holes on the display hinges.

## Step 63 — Replace the Screws

- Replace the screws that secure the hinge caps to the display hinges.

## Step 64 — Prying the Edges

- **WARNING:** Before working inside your computer, read the safety information that shipped with your computer and follow the steps in [Before Working Inside Your Computer](#). After working inside your computer, follow the instructions in [After Working Inside Your Computer](#).
- Using your fingertips, carefully pry up the inside edges of the display bezel.

## Step 65 — Turn it Over

- Carefully lift the display bezel and turn it over.

## Step 66 — Lifting the Latches

- Lift the connector latches and disconnect the display-board cables from the logo board.

## Step 67 — Disconnect the Logo-Board Cable

- Disconnect the logo-board cable from the logo board.

## Step 68 — Connect the Logo Board Cable

- Connect the logo-board cable to the logo board.

## Step 69 — Slide the Display-Board Cables

- Slide the display-board cables to their respective connectors on the logo board and press down the latches to secure the cables.

## Step 70 — Turn the Display Bezel Over

- Turn the display bezel over.

## Step 71 — Align the Bezel

- Align the display bezel with the display back-cover and gently snap the display bezel into place.

To reassemble your device, follow these instructions in reverse order.
