

# Dell Inspiron 11-3152 Screen Replacement

This guide will show you how to remove your screen so you can replace it.

Written By: Matthew Duncan

## INTRODUCTION

This guide will show you how to remove your screen so you can replace it.

### TOOLS:

- [Phillips #1 Screwdriver](#) (1)
- [Phillips #0 Screwdriver](#) (1)
- [Spudger](#) (1)

## Step 1 — Back Panel

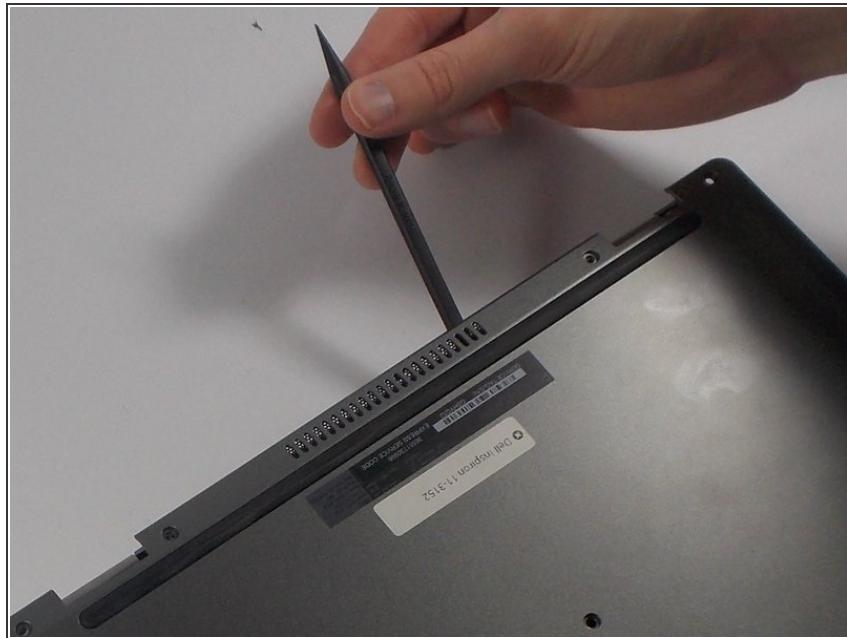

- Flip the computer over.

## Step 2

- Remove all nine 5mm Phillips head screws from the back cover using #0 Phillips head.

## Step 3

- Gently use a spudger to pull the cover away from the rest of the laptop. The cover will come off after you use the tool on two or three sides.

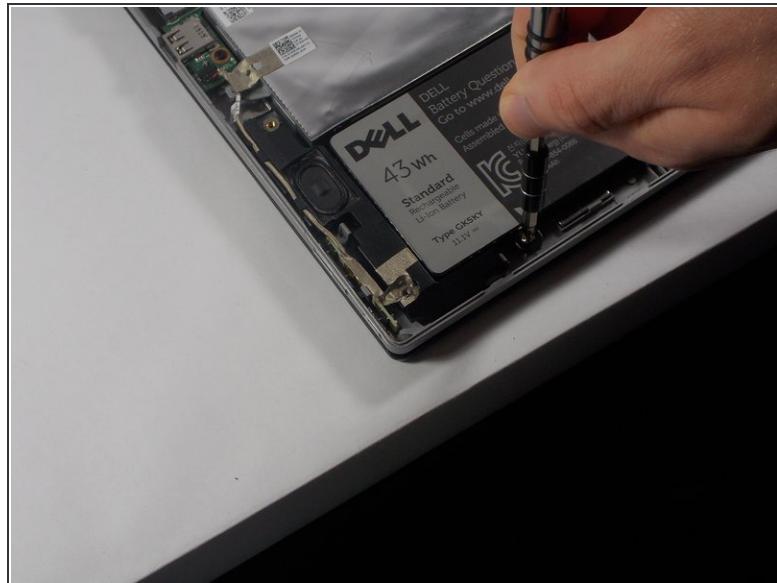

## Step 4 — Battery

 Make sure that the power is off.

- After taking off the back panel, you will see the battery located at the bottom of the computer system. It's black and is clearly labeled "dell battery".

## Step 5

- Locate the battery at the bottom of the computer and remove the four 3mm screws with a Phillips #0 head that hold the battery down.

## Step 6

- Remove the Solid State Drive wire from the battery clip by detaching the wire.
- This can be done by gently pulling the connector away from the battery clip.

## Step 7

- Remove the battery from the computer system by gently lifting it from the side.

## Step 8 — Screen

- Unscrew the brackets in the top right and top left of the laptop. Unscrew the two 1mm screw from both of the

brackets on both sides with #0 phillips head.

## Step 9

- Disconnect the aerial cables from the wireless controller by pulling them away from the laptop.

## Step 10

- Push the brackets up on both sides with your hands or spudger.

## Step 11

- At this point you can pull the bottom half of the computer away from the screen.
- The screen is now fully detached and ready to be replaced!

To reassemble your device, follow these instructions in reverse order.
