

# Dell Inspiron 14 N4050 Memory Modules Replacement

Written By: Terrence15

## INTRODUCTION

In this guide, we will be showing you how to remove and replace the Memory Modules.

## Step 1 — Popping up the Memory Module

**⚠** **WARNING:** Before working inside your computer, read the safety information that shipped with your computer. Follow the instructions in ["Before You Begin"](#).

**⚠** **CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as a connector on your computer).

**⚠** **CAUTION:** To prevent damage to the memory module connector, do not use tools to spread the memory module securing clips.

- Use your fingertips to carefully spread apart the securing clips on each end of the memory-module connector until the module pops up.

## Step 2 — Removing the Memory Module

- Remove the memory module from the memory-module connector.

## Step 3 — Align the Notch

- Align the notch in the memory module with the tab in the memory-module connector.

## Step 4 — Sliding the Memory Module

- Slide the memory module firmly into the slot at a 45-degree angle, and press the memory module down until it clicks into place. If you do not hear the click, remove the memory module and reinstall it.

● *NOTE:* If the memory module is not installed properly, the computer may not boot.
