

Dell Inspiron 14R-5421 Hard Drive Replacement

replace the hard drive

Written By: Jared paiva

INTRODUCTION

this guide will show you how to remove the hard drive within your laptop

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Battery

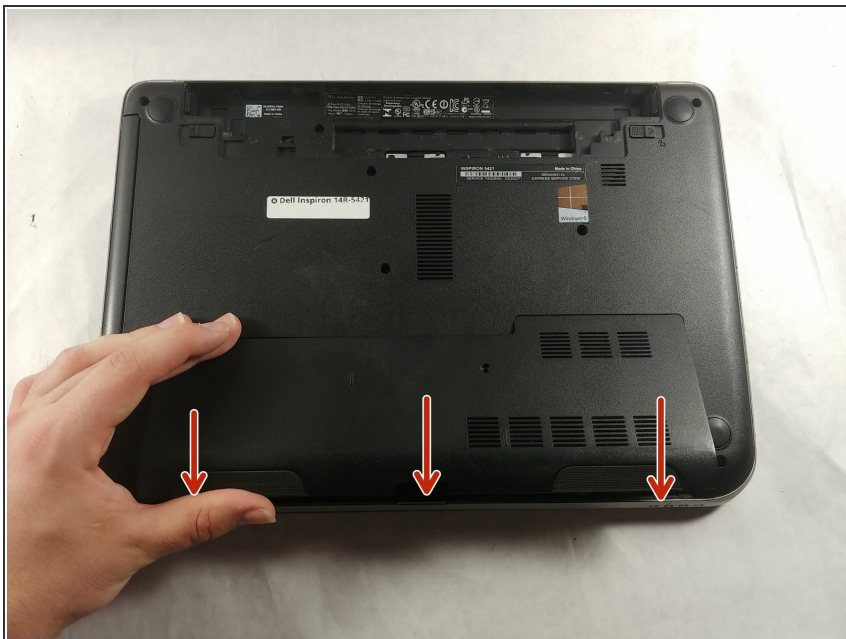

- Push the two sliders away from the battery towards the outer edges.

Step 2

- Remove the battery when it pops up.

Step 3 — Hard Drive

- Start by removing the cover that hides all the internal components by sliding it in the direction shown

Step 4

- Now remove the single screw that is securing the hard drive to the laptop noted by the red circle

Step 5

- Now carefully lift then pull the hard drive out to the left until it detaches

To reassemble your device, follow these instructions in reverse order.
