

# Dell Inspiron 14z 1470 Display Assembly Replacement

Written By: Terrence15

## INTRODUCTION

In this guide, we will be showing you how to remove and replace the Display Assembly.

### TOOLS:

- Phillips #0 Screwdriver (1)

## Step 1 — Remove the Screws

**⚠ WARNING:** Before working inside your computer, read the safety information that shipped with your computer. Follow the procedures in [Before You Begin](#).

**⚠ CAUTION:** To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface.

- Remove the two screws on the base of the computer that secure the display assembly to the computer base.

## Step 2 — Disconnecting the Display Cable

- Disconnect the display cable and remove the screw from the system board.

## Step 3 — Pull the Antenna Cables

- Pull the Mini-Card antenna cables up through the slot in the computer base.

## Step 4 — Note the Routing

- Note the routing of all the cables and remove them from their routing guides.

## Step 5 — Removing the Display

- Hold the display while you remove the three screws that secure the display assembly to the computer base.

## Step 6 — Removing the Display Assembly

- Lift and remove the display assembly from the computer base.

## Step 7 — Place the Display Assembly

- Using the alignment posts, place the **NEW** display assembly in position and replace the three screws that secure the display assembly to the computer base.

## Step 8 — Routing the Antenna Cables

- Route the Mini-Card antenna cables and display cable through their routing guides.

## Step 9 — Route the Antenna Cables

- Route the antenna cables through the slot in the computer base.

## Step 10 — Replace the Screw

- Replace the screw and connect the display cable.
