INTRODUCTION

This guide will show how to replace the RAM in a Dell Inspiron 15-5548 Laptop.

🔧 TOOLS:

- Phillips #00 Screwdriver (1)
- iFixit Opening Tools (1)
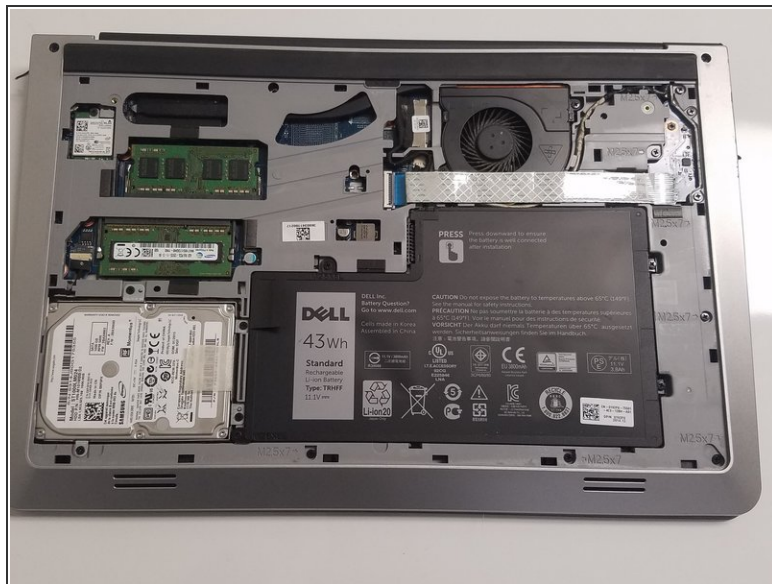

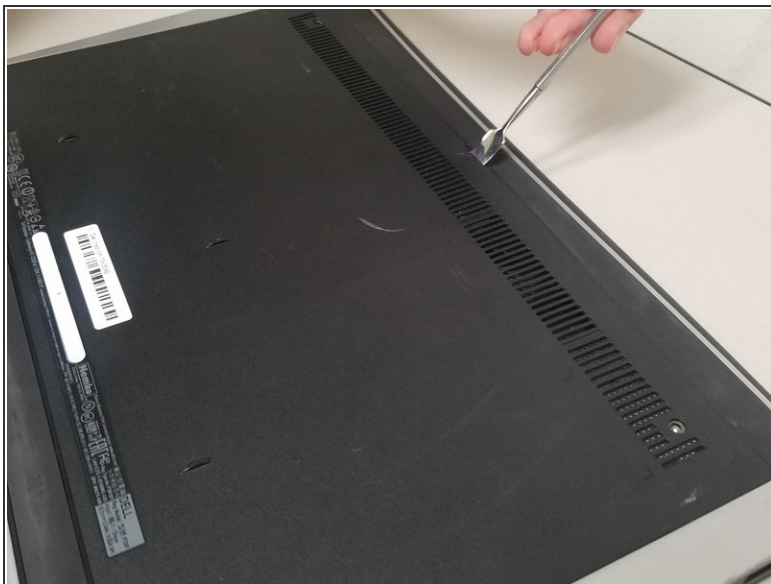

www.iFixit.com

Step 1 — RAM

⚠️ Unplug and power off the laptop.

- Turn the laptop over and locate both screws on the bottom.

- Unscrew the screws with a Phillips 00 Screwdriver.

Step 2

- Use the prying tool to pull up on the bottom cover.

Step 3

- Locate the RAM sticks on the left side of the device.

- Pull the metal tabs apart on both ends of the RAM stick.

- The RAM stick will pop up. Gently pull the RAM stick out.

To reassemble your device, follow these instructions in reverse order.
