

Dell Inspiron 15z 5523 Memory Module Replacement

Written By: Terrence15

INTRODUCTION

In this guide, we will be showing you how to remove and replace the Memory Module.

TOOLS:

- [Phillips #0 Screwdriver](#) (1)
-

Step 1 — Loosen the Screw

⚠ WARNING: Before working inside your computer, read the safety information that shipped with your computer and follow the steps in ["Before You Begin"](#).

- Close the display and turn the computer over.
- Loosen the captive screw that secures the memory-module cover to the computer base.

Step 2 — Lifting the Module Cover

- Using your fingertips, lift the memory-module cover out of the slots on the computer base.

Step 3 — Popping up the Memory Module

- Use your fingertips to carefully spread apart the securing clips on each end of the memory-module connector until the memory module pops up.

Step 4 — Align the Notch

- Align the notch on the **NEW** memory module with the tab on the memory-module connector.

Step 5 — Sliding the Memory Module

- Slide the memory module firmly into the connector at a 45-degree angle and press the memory module down until it clicks into place.

i NOTE: If you do not hear the click, remove the memory module and reinstall it.

Step 6 — Slide the Tabs

- Slide the tabs on the memory-module cover into the slots on the computer base and snap the memory-module cover into place.

Step 7 — Tighten the Screw

- Tighten the captive screw that secures the memory-module cover to the computer base.
