Dell Inspiron 530 DCMF Fan Replacement

This guide will show you how to replace your computer's main fan.

Written By: Drew Cunningham

INTRODUCTION
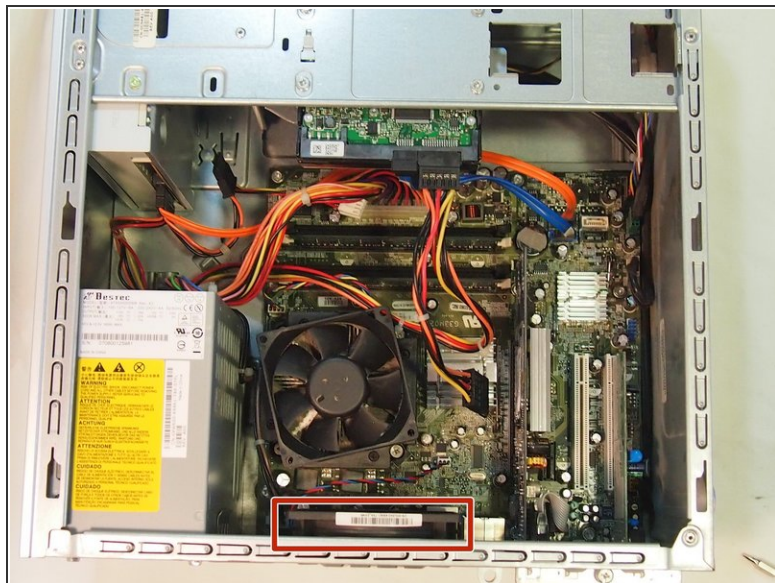

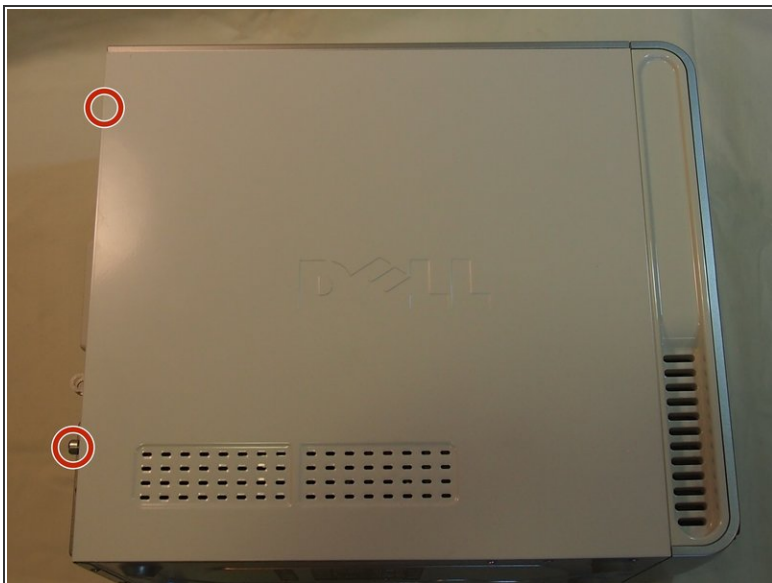

THe main fan keeps then interior of you computer from overheating. It can get clogged with dirt and need to be cleaned. Or replaced if broken.
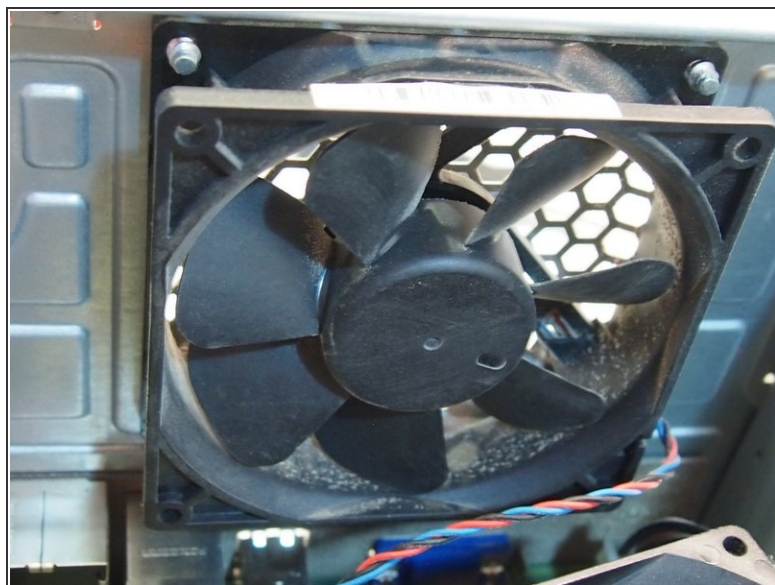

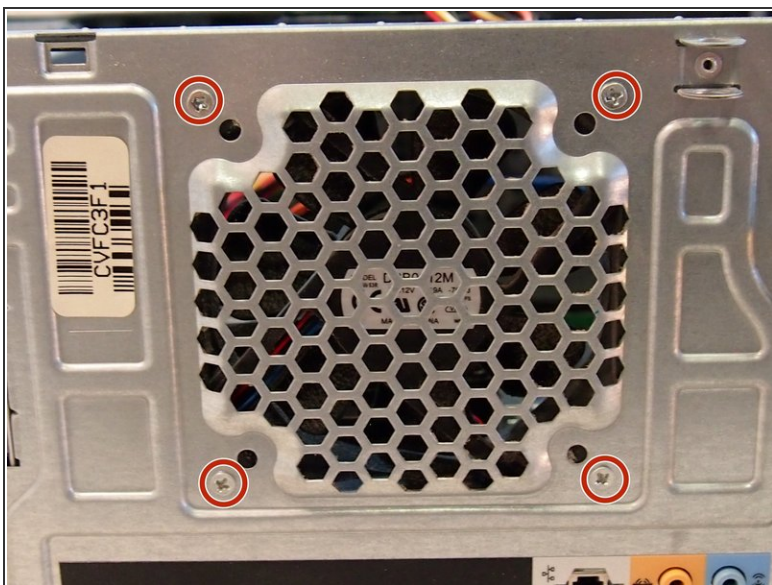

🔧 **TOOLS:**

- Screwdriver (1)

Step 1 — Fan

- Unscrew the two large screws in back that are holding on the side panel. Then slide the panel backwards to remove it.

Step 2

- The fan is held on by four screws that you must unscrew from the outside of the computer.
