

Dell Inspiron 700m Hinge Cover Replacement

Written By: irlandia

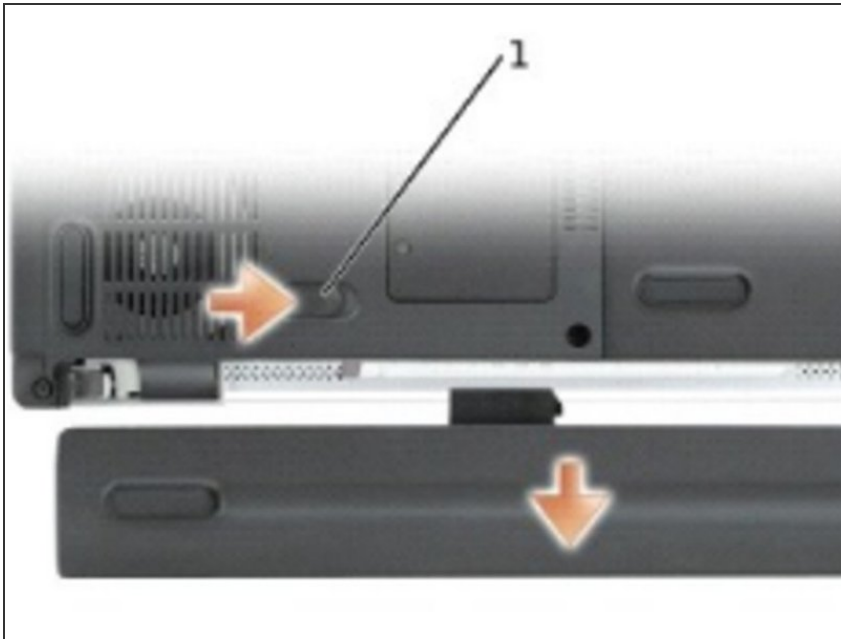

TOOLS:

- [Spudger](#) (1)
-

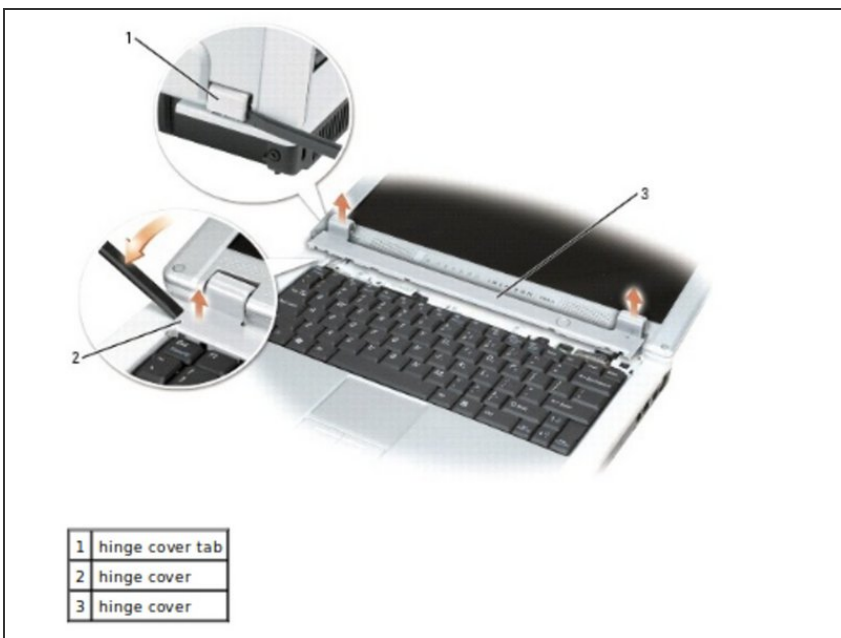

Step 1 — Removing battery

- Remove the battery.

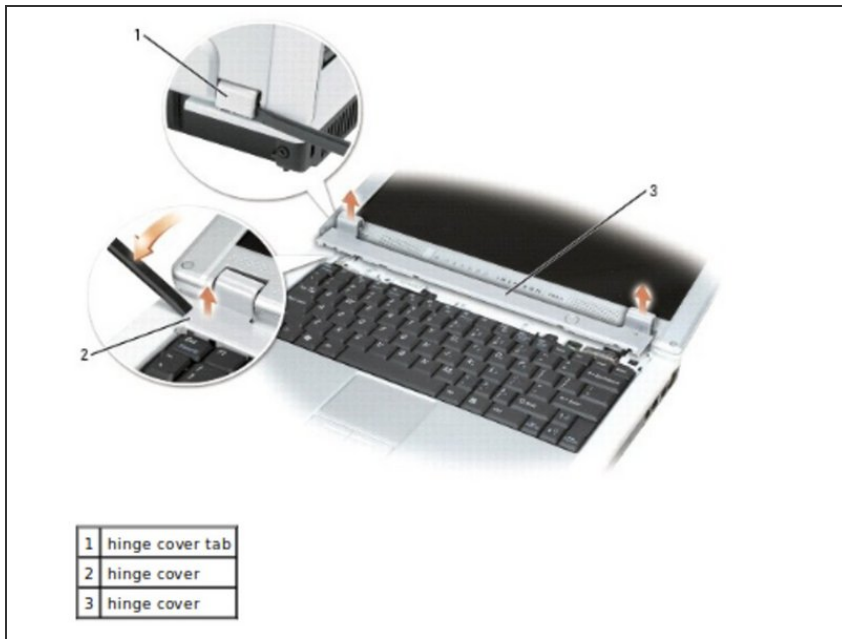

⚠ Make sure your computer is turned off and unplugged.

Step 2 — Open display

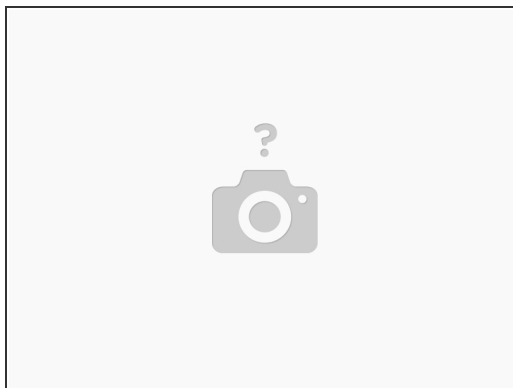

- Open the display 180 degrees.

Step 3 — Removing Display

- Use a plastic flat screwdriver to slide the hinge caps away from the computer.

Step 4 — Removing Display

- Detach the two display latches on the back of the computer.

Step 5 — Removing Display

- Use plastic flat screwdriver to carefully pry up the latches on either side of the hinge cover

Step 6 — Removing Display

- Carefully, lift the hinge cover from the main unit and remove it from the main unit.

To reassemble your device, follow these instructions in reverse order.
