Step 1 — Battery

- Remove the battery from the bottom of the laptop.

- Please click on the following link for further instruction on how to remove the battery. Dell Inspiron 9100 Battery Replacement

- It is important to remove the battery so that you will not be electrocuted while working with the computer's hardware.

Step 2 — RAM
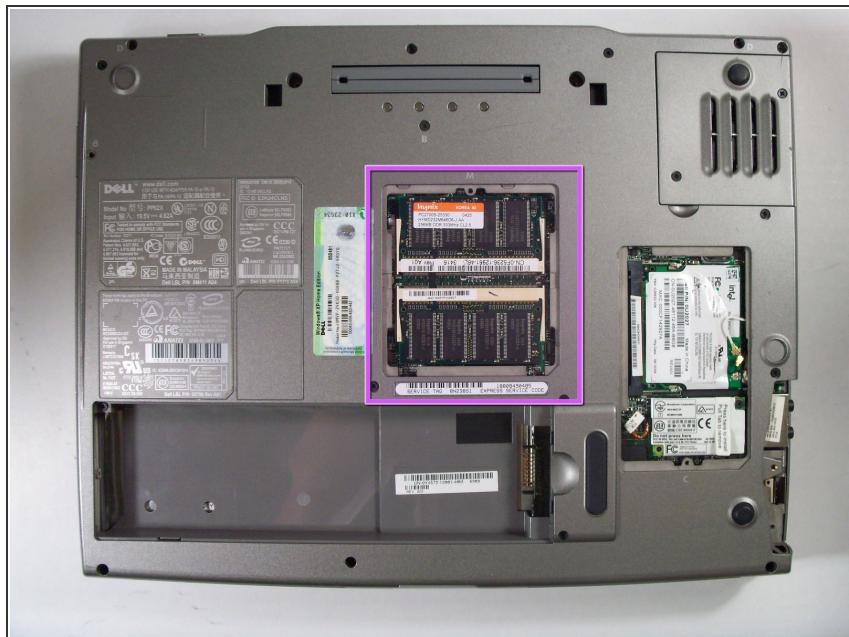

- Remove memory cover on bottom of laptop.

- To view the removal of the memory cover, follow the Dell Inspiron 9100 Memory Replacement.

Step 3
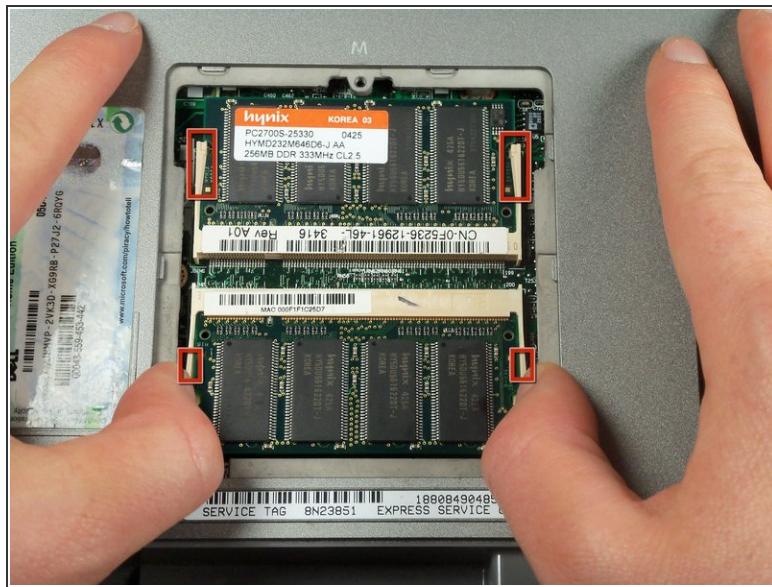

- Pull apart the white plastic tabs on either side of the RAM which will cause it to rise upwards.

- Gently remove the RAM, only touching the edges of the component.

To reassemble your device, follow these instructions in reverse order.
