INTRODUCTION

Use this guide to help you replace the RAM in a Dell Inspiron 1305.

⚒ TOOLS:

- Phillips #00 Screwdriver (1)

Step 1 — Battery

⚠ Save your work, power the laptop off, and ensure that the charging cable is unplugged before removing the battery.

● Flip the laptop over.

● Locate the battery release switch on the bottom of the laptop.

Step 2

● Slide the battery release switch away from the lock symbol until you hear the battery click.

● Slide the battery towards the back of the laptop until it comes free.

Step 3 — RAM

- Locate the RAM access door.

- Remove the two 5.5mm screws securing the RAM access door with a #00 Phillips screwdriver.

Step 4

- Using your fingers, open and remove the access door from the laptop, exposing the RAM underneath.

Step 5

- To access the RAM, push out the latches outward on the left and right of the RAM.

- To remove the memory card, pull it out of the tray with the latches still stretched out.

To reassemble your device, follow these instructions in reverse order.
