Dell Inspiron N5010 Memory Modules Replacement

Written By: Terrence15

INTRODUCTION
In this guide, we will be showing you how to remove and replace the Memory Modules.
Step 1 — CAUTION

⚠ WARNING: Before working inside your computer, read the safety information that shipped with your computer. Follow the instructions in __Before You Begin.__

⚠ CAUTION: To avoid electrostatic discharge, ground yourself by using a wrist grounding strap or by periodically touching an unpainted metal surface (such as a connector on your computer)

⚠ CAUTION: To prevent damage to the memory-module connector, do not use tools to spread the memory module securing clips.
Step 2 — Popping up the Memory Module

- Use your fingertips to carefully spread apart the securing clips on each end of the memory-module connector until the module pops up.

Step 3 — Remove the Memory Module

- Remove the memory module from the memory-module connector.

Step 4 — Align the Notch

- Align the notch in the **NEW** memory module with the tab in the memory-module connector.

Step 5 — Install the Memory Module

- Slide the memory module firmly into the connector at a 45-degree angle, and press the memory module down until it clicks into place. If you do not hear the click, remove the memory module and reinstall it.

- (i) NOTE: If the memory module is not installed properly, the computer may not boot.
