Dell Latitude X300 Keyboard Replacement

This guide shows you how to remove the keyboard from the Dell Latitude X300.

Written By: Jacob Egorov
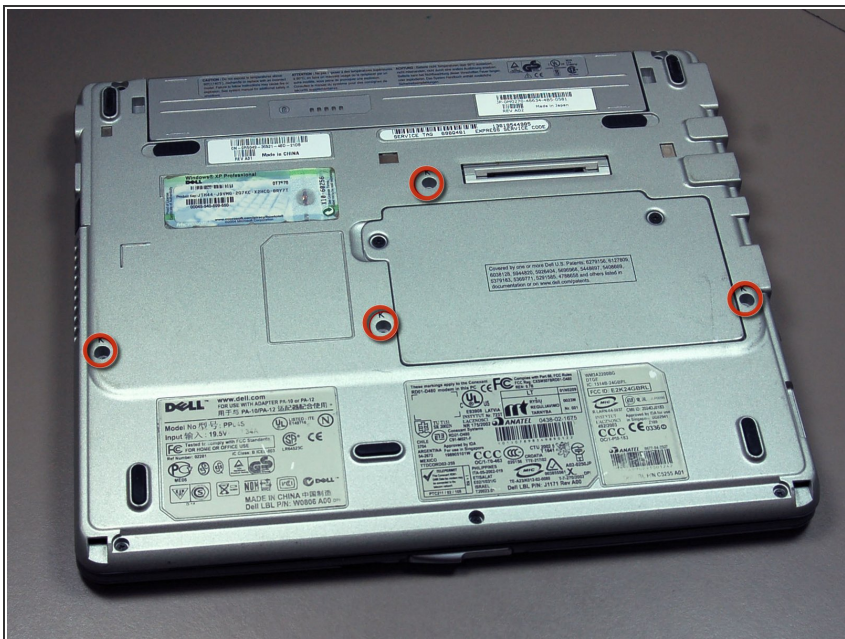

🔧 TOOLS:

- Phillips #0 Screwdriver (1)
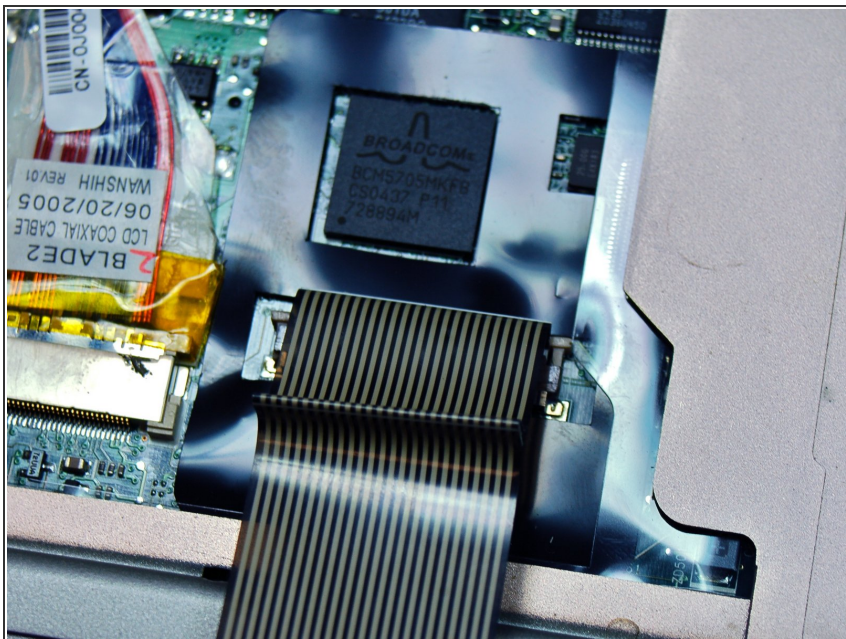

Step 1 — Keyboard

- Remove the four 4 mm Phillips #0 screws from the bottom of the laptop.

Step 2

- Carefully turn the laptop over and open the screen all the way.

- Locate the slot to remove the keyboard in the lower left hand corner.

- Using a spudger as a lever, insert it into the slot and gently pry up.

Step 3

- After the keyboard pops up, pull it away from the screen just enough to release the tabs.
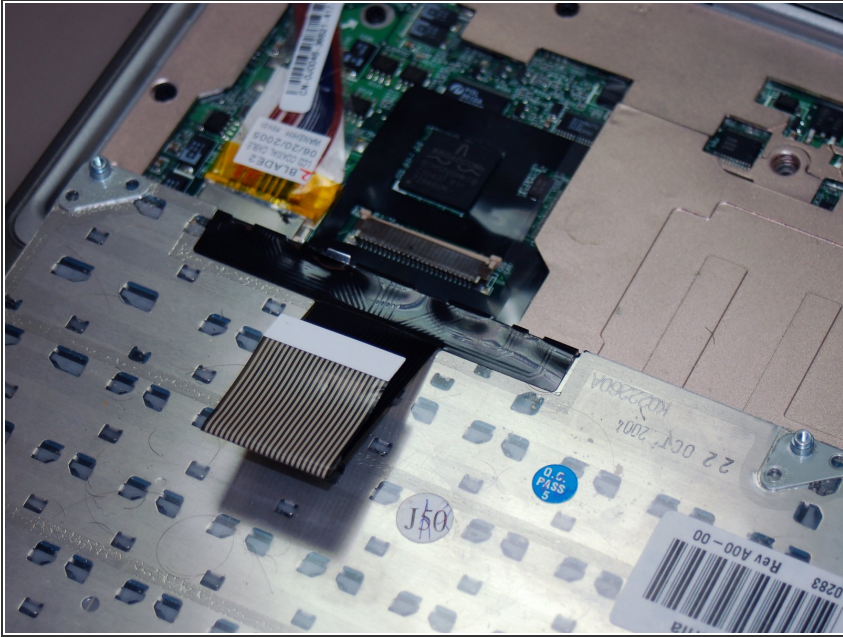

- ⚠️ Don't pull the keyboard out forcefully as there is still a ribbon attached to the laptop.

Step 4

- Unlock the ZIF connector on the computer by pushing the two outside tabs toward the screen.

Step 5

- Remove the flexible ribbon from the ZIF connector.

⚠ Do not pull on the ribbon to remove it from the ZIF connector.

To reassemble your device, follow these instructions in reverse order.
